ENGLISH SECRETARIAT LIBRARY.

CENSUS REPORT

OF

KASHMIR STATE,

1891.

CHAPTER I.

General description, physical and climatic divisions, rainfall, area, density, proximity of towns and villages, rural and urban population.

1. The Native State of Jammu and Kashmír is politically subordinate to the Government of India, and constitutes the territories of the Mahárája of Kashmír, extending from 32° 17′ to 36° 58′ North-latitude, and from 73° 26′ to 80° 30′ East-longitude. Its area is 80,900 square miles, with a population returned in 1891, of 25,43,952 persons. No previous Census appears to have been taken, the enumeration of 1873 being far from reliable. The State is bounded on the North by some petty semi-independent hill chiefships mostly subordinate to Kashmír, and by the Karakorum mountains, on the East by Chinese Tibet, on the South and West by the Panjab Districts of Ráwalpindi, Jhelam, Gujrát and Siálkot and the Hazára country.

2. For administrative purposes it is divided into the following Divisions :—

Jammu (including the feudatory Jágírs of Rámnagar, Bhadráwah and Punch).
Kashmír, Ladákh, Skardu and Gilgit.

3. The Provinces of Jammu and Kashmír form the more important part of the State, while Ladákh, Skardu and Gilgit owe their importance to their position on the Frontier.

4. The greater portion of the country is mountainous, and with the exception of a strip of plain on the south-west which is continuous with the great level of the Panjab, may be conveniently divided into the following regions :—

1*st*.—The outer hills and the middle mountains of Jammu District.
2*nd*.—Kashmír.
3*rd*.—The far side of the great watershed range.

(*a*). Semi-Tibetan climate including Astor and some parts of Gilgit and Baltistán.

(*b*). Tibetan or almost rainless climate taking in the rest of Gilgit, the greater part of Baltistán and all Ladákh.

5. The hills in the outer region begin with a height of 100 to 200 feet above the plain, followed by a tract of rugged country, including various ridges running nearly parallel to the first one, with long narrow valleys between them.

6. The average height of these ridges ranges from 3,000 to 4,000 feet.

7. The middle mountains are commonly 8,000 to 10,000 feet high, covered with pasture, or else with forest, then follow the more lofty mountain ranges, including the region of perpetual snow.

8. A great chain of snowy mountains running south-east and south-west, divides the drainage of the Chenáb and Jhelam rivers from that of the higher branches of the Indus.

9. What may be called branches from this, enclose the valley or plain of Kashmír.

10. All beyond that great range is a wide tract of mountainous country the whole of which is at a high level, it is the north-western part of Tibet, embracing Ladákh, Baltistán and Gilgit.

11. Here the mountain ranges are of heights of from 17,000 up to 22,000 feet and more.

12. The whole country abounds with valleys, varying in character, and in a few places with table-lands.

13. With these great variations of level the climate is necessarily different for every region.

14. The temperature ranges from the more than tropical heat of the Panjab summer, to such an intensity of cold as keeps perpetual snow on the mountains. In the inhabited places even the variation is such that in the parts the fashion of the poor of India, going almost unclad is followed, in the higher sheep skin coats are wanted for protection against the cold, and people are in places confined to their houses by snow for seven months in the year.

15. Besides temperature there is the element of moisture, which gives another variety to the climate.

(1)—The outer hills and the middle mountains of Jammu where the periodical rains prevail.

(2)—Kashmír, where the periodical rains reach partially, but there is rain-fall enough for all crops but rice without need of irrigation.

(3)—Astor with some parts of Gilgit and Baltistán, where no crops can be raised without irrigation and the hill sides are for the most part bare, but some forest grows on portions of the mountain slopes.

(4)—The rest of Gilgit and the greater portion of Baltistán where no crop can be raised without irrigation, and the whole country is bare both of forest and of pasture, this tract is nearly rainless.

16. The general aspect of the Valley of Kashmír is that of a basin, encircled on every side by lofty mountains. In the middle is an extensive alluvial tract intersected by the Jhelam and its numerous tributaries which flow down from the mountains and find their way by the sole channel of the Jhelam through the Bárámulá Pass to the plains of the Panjab. The elevation of this valley is about 5,200 feet above the sea.

17. Besides the low alluvial tract extending along the banks of the Jhelam, there occur extensive plateaux of slight elevation stretching from the mountains at various distances into the plains. These plateaux are known as Karewas. Their soil for the most part is a loam or loamy clay, containing remains of fresh water, fishes and molluscs, which indicate a locustrine or fluvial origin. They are divided from each other by ravines of from 100 to 300 feet in depth. Occasionally they are entirely surrounded by lower ground, but more generally they connect with some of the mountains that bound the valley. Over the surface of the Karewas, water has some times been brought for irrigation, and then a fertile tract is the result, but more commonly the cultivation depends on rain alone, and in that case the yield is precarious. The slopes of the hills between the flat ground and the limit of forest, are a mixture of cultivation, good grazing grounds, and forests of cedars, pines, firs, &c.

18. The southern and more inhabited portion of Kashmír includes the lower half of the Kishen Ganga Valley and the whole district south of the snowy range that separates the drainage of the Indus from that of the Jhelam and Chenáb. In this region the hills are covered with pine forests interspersed with pastures, the banks of the streams are green with cultivation; villages are connected with each other by roads, while the principal valley is crowded with objects of interest and is fertile and beautiful in a high degree.

19. The beauties of the Kashmír Valley have been so often celebrated in prose and verse that further allusion to them here would be out of place. The Pír Panjál range is said to have been the home of a Pír or Saint, who gave benediction to travellers passing northwards over the mountains. The belief is still current among Mohamedans in Kashmír that the Pír resides on one of the summits and the whole range is thus invested with peculiar sanctity.

20. The general direction of the range is from north-west to south-east.

21. The margs or mountain downs, which are numerous on the tops of the range of the hills immediately below the Pír Panjál, and also upon the northern slopes of those mountains which enclose the north-eastern side of the valley, are a peculiar feature of the country. They are covered with rich grass, and afford pasturage during the summer months to large herds of ponies,

			Total Population.
Kashmir District ...	Srinagar	...	1,18,960
	Anantnág	...	10,227
	Sopore	...	8,410
	Bárámula	...	5,656
	Total	...	1,43,253
	Grand Total	...	1,97,743

There are no towns in Ladákh, Skardu and Gilgit.

41. The city of Jammu is situated on the Tawí, a tributary of the Chenáb among the mountains of the outer Himalayan range. It is the seat of the Government. The town and palace stand upon the right bank of the river, the fort overhangs the left or eastern shore at an elevation of 150 feet above the stream. It is the largest city in the province.

42. Srinagar (or Surjyanagar, the city of the Sun) is picturesquely situated in the "Happy Valley" of Kashmír, about mid-way between its two ends, and close to the hills which bound its north-western side, on the banks of the River Jhelum in latitude 34° 5′ 31″ North and longitude 74° 51′ East. The city extends for about 2 miles along the banks of the river, which divides it into two nearly equal portions, connected by seven bridges.

43. Srinagar is built at an elevation of about 5,276 feet above the sea, but is surrounded by low swampy tracts, which render it unhealthy.

44. Fires are frequent, and often very destructive.

45. The public buildings are few. The principal of them are the Bárádari, palace, fort, gun-factory, dispensary, school and mint; also some ancient mosques, temples and cemeteries.

46. The streets are generally narrow, and some of them are paved with large and irregular masses of lime-stone. They are all, however, very dirty and unfit to be visited by ladies. There are several Bazars or market places in different parts of the city, one of which called the Mahárájganj, has been lately built for the convenience of visitors, in which all the manufactures peculiar to Kashmír can be readily obtained. There are several large mansions on its outskirts, chiefly occupied by the great shawl merchants and bankers; some of them exhibit beautiful specimens of trellised wood-work, and in other respects are very tastefully fitted up.

47. The Takht-i-Suleman, or throne of Solomon, is a hill over-looking the city from which a good view is obtained. On the top is a fine old stone temple called by Hindus, Shankar Áchárya; it was originally Budhist, and was built by Jaloka, son of Asoka, about 220 B. C.

48. The "Hari-parbat" or "Fort Hill," is an isolated hill on the northern outskirts of the city. It is about 250 feet high, and is crowned by the fort. A wall surrounds the hill, in which the principal gateway, called the Káti Darwázá, is surrounded by a Persian inscription. Both wall and fort were built by Akbar Shah about 1590 A. D., at a cost of a million sterling. The length of the wall is about 3 miles, its height 28 feet.

49. The Shergarhi, within the city, contains the city fort and the royal palace. It is 400 yards long by 200 wide; its walls are about 22 feet high, and the interior contains the State apartments, Government offices and barracks. The Juma Masjid or Cathedral Mosque, which is in the city, is a very large four-sided building, with an open square in the centre and a wooden steeple in the middle of each side, the roof of the surrounding cloister is supported by wooden pillars, each formed of a single deodar tree about 30 feet high.

50. The Dal or City lake of Kashmír which has been sung by Moore in Lalla-i-Rookh, lies on the north-eastern side of the city. It is about 5 miles long 2½ miles broad with an average depth of about 10 feet. Its surface in many parts is covered with the famous Kashmírian "floating gardens"—Shalimár Bágh well-known as the scene of Moore's Light of the Harem, is a beautiful pleasure ground laid out by Jahángír, the Nasim Bágh, or garden of bliss, another picturesque pleasure ground, is said to have been first planned by Akbar, and there are several other gardens of similar character in the environs of Srinagar.

51. A large population of the inhabitants are shawl weavers, with their usual complement of dyers, washers and brokers, the other ornamental arts are silver work, papier machí painting. There is every variety of handicraft usually found in an Indian city, but few of these either from superiority of skill or from the importance of numbers, require special mention.

52. The other towns are hardly of any importance to deserve special mention.

53. The total area of the Kashmír State is 80,900 square miles. The Provinces and Districts have never been brought under measurement, and it is under the circumstance impossible to determine the order in which the districts fall when arranged according to area, and to show the relationship between population and area.

54. The total population is 25,43,952 or 31 per square mile.

55. Arranged according to population the districts fall as below, but in the absence of a proper record of measurement this is mere guess work based on personal local knowledge of the country.

	Jammu.	*Kashmír.*	*Ladákh.*	*Skardu*	*Gilgit*
Densely populated ...	Ranbir Singhpura ...	Khás ...	...	...	..
	Bhimbar	Kámráj ...	...	...	
Fairly densely peopled ...	Jasrota	Anantnág ...	...	...	..
	Reasi and southern portion of Udhampore	...	...	...	...
Averagely thinly peopled ...	Northern portion of Udhampore	Muzafferabad	Skardu		...
Sparsely peopled ...	... ...	...	Ladákh ...		Gilgit.

56. Table I. deals with houses, towns, villages and population. There are 8 towns and 8,411 villages in the State distributed as follows:—

	Number of towns.	Number of villages.
Jammu	4	4,323
Kashmír	4	3,649
Ladákh	...	86
Skardu	...	243
Gilgit	...	110
Total ...	8	8,411

57. Occupied houses number 4,47,993, of which 36,252 or 8·1 per cent. belong to the urban, and 4,11,741 or 91·9 per cent. to the rural population. The detail of percentage by Provinces and Districts is as follows:—

(I).—PROVINCES.

	Urban Population.		Rural Population.	
	Number of houses.	Percentage.	Number of houses.	Percentage.
Jammu	9,895	2·3	2,52,551	56·5

Gilgit	87	1·03	19	0·22	3	0·04	.		1	0·01	..	..	...	...
Total .	4,662	55·4	2,551	30·3	874	10·38	266	3·16	12	0·49	15	0·17	9	0·10

Villages below 500, average about. 86 per cent. above 500 but not exceeding 1,999, 13½ per cent.

63. These statistics, it must be confessed, are to a great extent misleading, except in the Kashmír Valley and the plains of Jammu Province, the unit known as a village could hardly be said as correctly representing collocation of the population in aggregates large and small. The division into villages is one made for fiscal purposes without any reference to collocation. In the hilly tracts every farmer or cultivator has his homestead in the immediate vicinity of his farm and is naturally secluded from his fraternity by intervening forests and waste-lands. A village with a population of 200 persons not unfrequently comprises 60 houses situated within a radius of 3 to 4 miles from each other, and are yet considered one village with special reference to the revenue area under their cultivation. The same remarks apply to nomadic villages of herdsmen, Gujars, &c., in the Udhampore, Punch and other districts where cattle breeding is the principal source of income.

64. Collocation of the population in large or small aggregates, practically exists in towns, and in villages where cultivation covers extensive areas divided among communities occupying holdings in close proximity to each other, or where such collocation has been made to ensure supplies for the outside population, as Udhampore and other marts of internal trade which are small townships for the exchange of commodities.

65. The relative proportion of the Urban and Rural population is given below :—

	Total Population.	Urban.	Rural.	Percentage.	
				Urban.	Rural.
Jammu	14,39,543	54,490	13,85,053	3·7	96·3
Kashmír	9,49,041	1,43,253	8,05,788	15·1	84·9
Ladákh	28,274	...	28,274	...	...
Skardu	1,10,325	...	1,10,325	...	...
Gilgit	16,769	...	16,769	...	...
Total	25,43,952	1,97,743	23,46,209	7·7	92·3

66. The towns in this State are the nucleus of trade.

Jammu owes its development to the fact of its being the Capital of the State, the head quarters of the Chief and Provincial Establishments and the principal mart of commerce with the hilly tracts comprising the high road to Kashmír *viâ* Banihál.

Srinagar, to influx of visitors to the Valley, and the Chief seat of the Hindu and Mohamedan gentry of the Province.

CHAPTER II.

Movement of the Population.

67. In the absence of any previous Census it is impossible to deal with the movement of the population, but advantage will be taken to discuss elsewhere the inequalities in sexes which throw some light on the subject.

CHAPTER III.

Religion.

68. The inhabitants of the State may, in regard to religion, be distinguished as Hindus, Jains, Sikhs, Mohamedans, Budhists, Christians and Parsís.

69. There were no Jews on the night of the Census.

70. The following table shows the number returned under each religion and its ratio to the total population :—

	Hindus.	Jains.	Sikhs.	Mohamedans.	Budhists.	Christians.	Parsís.	Unspecified.
Jammu	6,31,225	593	5,926	7,97,459	4,293	46	1	...
Kashmír	60,316	...	5,473	8,83,099	...	145	8	...
Ladákh	182	...	...	2,991	25,076	25	...	...
Skardu	64	...	...	1,10,022	239	...	...	...
Gilgit	13	...	...	139	...	2	...	16,615
Total ...	6,91,800	593	11,399	17,93,710	29,608	218	9	16,615

(II). Ratio of Hindus, Mohamedans and Budhists to total population :—

	Total population.	Hindus, including Jains & Sikhs	Mohamedans.	Budhists.	Unspecified.
Jammu	14,39,543	44·3	55·5	0·2	...
Kashmír	9,49,041	6·9	93·1	...	...
Ladákh	28,274	·6	10·5	88·9	...
Skardu	1,10,325	...	99·7	·3	...
Gilgit	16,769	·07	·83	...	99·1
Total ...	25,43,952	27·7	70·5	1·2	·6

71. The above figures prove :—

(1).—That the predominant religion of the State is Mohamedanism, representing 70 per cent. of the total population.

(2).—That next in order stand Hinduism, representing 27 per cent., Budhist 1·2 per cent., Sikhs ·4 per cent., and Jains ·02 per cent., of the total population.

(3).—That Christians number only 218 and Parsís 9, a very small minority.

(4).—That Hindus are mostly found in Jammu, and represent a very small minority in Kashmír, while in Ladákh, Skardu and Gilgit, their numbers are quite insignificant.

(5).—That Sikhs are found only in Jammu and Kashmír, and Jains only in Jammu; that Mohamedans out-number Hindus almost in every part of the State.

(6).—That Skardu and Gilgit are solely Mohamedan tracts.

N.B.—The number shown as "unspecified" against Gilgit are mostly Mohamedans.

(7).—That Ladákh is the chief seat of Budhism.

(8.)—That Christians are confined to Jammu, Kashmír and Ladákh, and Parsís to Jammu and Kashmír.

Thus out of every 10,000 inhabitants in the State, there are 2,770 Hindus, (including Jains and Sikhs), 7,050 Mohamedans and 120 Budhists. Christians and Parsís represent respectively 8 and ·3 to every 1,00,000 of the population.

72. Major Sub-division of Hindus.—The animistic or the religion of the forests and hill-tribes is unknown in this country, the prevailing religion being the Brahmanic orthodox Hinduism. A distinction may, however, be drawn between pure and impure Hindus, the former comprising Hindus of all denominations, excepting Bhangis and artisans of low castes, who though classed generally as Hindus are, in consequence of their trade and occupation, the inferiority of their social status and adherence to usages and customs prohibited in other orders, considered a quite distinct creed.

73. No persons have been returned as "Aryans" or Brahmos.

74. Barring a few Sayads, Moghals and Pathans of Non-Indian origin, the Mohamedan population of this State is either of Hindu or Budhist origin, and opportunity will be taken, when dealing with castes and their Sub-divisions, to furnish all the information contained in the statistics, but considering that no previous Census of the State has been taken, it would be premature from a statistical point of view either to collate communities of probably one origin but split up at the present time into Hindus, Musalmans and Christians, or to draw conclusion from those figures. Hindus however might, as explained above, be sub-divided into :—

(1) Followers of the Brahmanic Religion.

(2) Impure castes, (3) Sikhs and (4) Jains, as the subjoined table will show.

	Jammu.			Kashmir.			Ladakh.			Skardu.			Gilgit.

Jains	749	...	...	...	...	749
Grand Total ...	855	773	58	122	...	847

75. The district of Ladákh contains:—

	Total.	*Males.*	*Females.*
Brahmanical Religion	180	170	10
Impure castes	1	1	...
Unspecified	1	1	...
Total ...	182	172	10

76. These are mostly immigrants from the Panjab and the adjoining Province of Kashmír, including State employés, which circumstance accounts for the absence of Hindu females.

77. The majority of the Hindu population is confined to the village of Ladákh which is the entrepot of trade with Yarkand and Chinese Turkistan.

78. The same circumstances account for the inequality of sexes in Skardu where the Hindu population comprises 57 males and 7 females as detailed below:—

	Total.	*Males.*	*Females.*
Brahmanical Religion	63	56	7
Unspecified	1	1	...
Total ...	64	57	7

79. Traders and State employés proceeding to Ladákh and Skardu rarely take their families with them.

80. In Gilgit the figures represent coolies employed on the road, a detailed Census of the Civil District of Gilgit itself not having been taken.

81.—MOHAMEDANS.

	Total.	Males.	Females.	*Ratio per* 1,000 *to total population.*		Average number of females to 1,000 males.
				Males.	Females.	
Jammu	7,97,459	4,24,371	3,73,088	532	468	879

Total ...	17,93,710	9,47,162	8,46,584	528	472	893

82. The Mohamedans of this State are with few exceptions, purely of Indian origin. About 1000 A. D. the population of Kashmír and Jammu Provinces was mostly Hindu, the majority being Brahmans, Rajpúts and Khatrís. The Non-Indian or Asiatic Mohamedans consisted only of a few Sayads, Moghals and Patháns, who were imported by the local Mohamedan rulers of the country.

83. The population of the Frontier Provinces of Ladákh and Gilgit was Budhist, while Skardu was partly Budhistic and partly Brahmanic.

84. The Non-Indians though they can be hardly classed as such in consequence of intermarriages with the tribes of Indian origin are returned as follows :—

	Total.	*Males.*	*Females.*
Sayads	1,14,393	59,940	54,453
Moghals	16,588	8,757	7,831
Patháns	38,016	20,331	17,685
Total ...	1,68,997	89,028	79,969
Tribes of Indian origin... ...	16,24,713	8,58,098	7,66,615
Grand Total ...	17,93,710	9,47,126	8,46,584

85. The following traditional account of the development of Sunní and Shíah sects among the local Mohamedans, is as interesting as it is amusing.

There could be no doubt that originally, the local Mohamedans were Sunnís, believers in the Divine mission of Shah Hamdán, a Saint of Bukhara, whose pseudo mausoleum is situated in the heart of the city of Srinagar. In the reign of Zainulábdin, acting under the influence of their co-religionists in Badakhshán, the people of Hunza-Nagar and surroundings of Gilgit joined the Shíah sect believing in the Divine incarnation of Ali, in consequence of which they are called Ali-ullahs. The Mohamedans of Gilgit of the present day are still Shíahs.

In 1450 A. D. Shams-ud-Din Iraki, a Shíah missionary, visited Kashmír, the Mohamedan population of which Province, as has been already described, were Sunnís followers of Shah Hamdán, and pretending to be a descendant of that Saint, easily attracted the simpletons of the day. His son Danial was the author of a work intended ostensibly to reconcile differences between the Sunnís and Shíah sects, but having for its ultimate object the propogation of the Shíah faith his followers are styled Nur Bukhshi, after the name of Nur Bakhsh, one of the disciples of Shah Hamdán. They are as a class devout followers of Islam and well versed in the philosophy of their religion, and are mostly found in Skardu and the adjoining Jammu District of Kishtwár.

In 939 (A. H.) corresponding to 1532 A. D. the Shíah system encountered a severe defeat at the hands of Mirza Haidar, the conqueror, who having obtained from the learned men of Delhi an edict denouncing Danial's philosophical work to be a piece of blasphemy, deputed Mulla Kásim to Skardu, where he not only succeeded in restoring the Sunní system, but instigated his votaries to put Danial to death as an imposter. The victory, however, was not complete, a predilection for the Shíah sect again sprang up, and in 988 A. H. Kagarmusa, a Sunni missionary was assassinated by the revolting tribes. This incident roused the indignation of the Emperor Akbar who sent out an expedition to Kashmír, and again there was a revival of Sunnism.

The Núr Bakhshi Shíahs, unlike their fraternity in other part of the country, are not very strict in popular denounceation of the Divine mission of the three apostles of Mohamed, and recite their prayers according to the Sunni method. The Shíahs are avowed enemies of the Sunnís, and not unfrequently quarrel with each other.

Mohamedanism in Ladákh dates from 1074 Hijri (1663 A. D.) and is said to owe its origin to an expedition headed by Saif Khan. The first Mohamedan convert was Duldul a rich influential zemíndár who constructed a Mohamedan mosque. The prevailing sect in Ladákh and Tibet Kalan is Sunnism.

Two-thirds of the population of Skardu are Shíahs and one-third Sunnís.

86. The following table shows the proportion of males to females in the Urban and Rural population of Hindus and Mohamedans :—

	Hindus.				Mohamedans.			
	Total population.	Males.	Females.	Average number of females to 1,000 males.	Total population.	Males.	Females.	Average number of females to 1,000 males.

87. The apparent deductions from these figures are :—

(1).—That on the whole the average number of Mohamedan females to every 1,000 males is larger than the corresponding proportion of Hindu females, the only exception being in the city of Mirpore, where Hindu females average 1,013 as against 968 Mohamedan females.

(2).—That the excess difference noted above (excluding Ladákh, Skardu and Gilgit which require special explanation) is abnormally large in the cities of Punch, Anantnág, Sopore and Bárámula, in the Rural population of Kashmír Province, and in the whole Province of Kashmír generally.

(3).—That it is lowest in the Rural population of Jammu Province and in the Urban and Rural population of Jammu Province combined.

(4).—That the Urban population of the whole State represents an excess difference of 195 and the Rural population 29.

88. Taking the Rural population as representing the normal standard of equality of sexes, the figures stand as follows :—

	Hindu females to every 1,000 males.	Mohamedan females to every 1,000 males.
Rural population, Jammu Province ...	875	885
Do. Kashmir do. ...	721	895
In Ajmere Merwara (1881) the proportions were	870	740

So that as a rule, the inequality of sexes in this State does not seem to call for special remark excepting of course the Province of Kashmír, where Mohamedan females were 895 as against 721 Hindu females to every 1,000 males, which was apparently due to the absence of Mohamedan males who unlike Hindu males, largely seek employment as coolies in the Panjab.

89. Males as a rule undoubtedly outnumber females, the average standard being about 879 females to every 1,000 males throughout the State.

90. Full explanation of the abnormal inequalities of sexes between Hindus and Mohamedans, is reserved, till the statistics of age and religion are subjected to careful scrutiny and examination, but it would nevertheless be worth while to make a passing allusion to certain salient points suggested by local peculiarities.

(1).—That in the towns of Jammu and Punch the low ratio of females is accounted for by the presence of a considerable number of males, as members of the Military and Police Forces and Civil Departments of the State.

(2).—That in the town of Mirpore the high ratio of Hindu females is due to the absence of males on employment in other parts of the country.

(3).—That while the Hindus of Kashmír Province are mostly Brahmans who employ themselves either in agriculture or service of the State, the Mohamedans in the towns of Srinagar, Anantnág, Bárámula and Sopore, who are not well off, seek employment as coolies in the Panjab, notoriously during the cold season, when agricultural pursuits are temporarily suspended, this probably explains the reason why among the Mohamedans of Kashmír towns, the ratio of females is as high as 902, 919 and 942 per thousand males.

(4).—It is noteworthy that in the rural population of Jammu Province, Hindu and Mohamedan females average 875 and 885 respectively per thousand males, the slight difference of 10 per mille being quite insignificant, while in the rural population of Kashmír the ratio of Hindu females is 721 as against 895 per mille returned for Mohamedan females.

91. Budhists.—The Budhists number 29,608 (males 14,942 and females 14,666) and are distributed as follows :—

	Total.	Males.	Females	*Proportion per mille to total population.*		Average number of females to every 1,000 males.
				Males.	Females.	
Jammu Province	4,293	2,179	2,114	508	492	970
Ladákh	25,076	12,615	12,461	504	496	987
Skardu	239	148	91	619	381	614
Total ...	29,608	14,942	14,666	503	497	981

92. The relative proportion of Hindu and Mohamedan females as compared with Budhists is as follows :—

	Per mille to total population of		Average number of females to every 1,000 males (excluding urban population.)
	Males.	Females.	
Hindu	541	459	866
Mohamedan	528	472	895
Budhist	503	497	981

It is singular that Budhist females claim the highest proportion and the highest average.

93. Barring Skardu where the males outnumber females rather disproportionately, the females are almost equal in number to males, notwithstanding the fact that polyandry largely prevails in Ladákh, and the Lamás (priests) are celibates.

94. In the absence of statistics of civil condition, it is impossible to collect material for the solution of the difficult problem of inequality of sexes.

95. The system of polyandry is strictly confined to brothers, each family of brothers has only one wife in common, the most usual number of husbands is two, but three or even four husbands are not uncommon. The system prevails of course only among the poor classes, and is said to have originated from the smallness of the extent of land and the general inelasticity of the resources of the country, the isolation from the rest of the world, manners, language and religion, as well as geographical isolation accounting for absence of emigration. It was found impossible for the younger ones either to marry and settle or to go out for their living, and they naturally become more helpers in the household from servants to the elder brother. From that there came about the curious custom that when the elder brother married a wife she became a wife to all the brothers. The younger brothers remain in a very subordinate position in the family, but the wife is held in common. The children recognize all as father, speaking of their elder and then younger father. In addition to this form of polyandry there is liberty for the woman to choose yet another husband from a different family, a stranger.

96. The religion of Ladákh is a modified form of Indian Budhism. The modification is due to the introduction of the mystical system of the Tantrists, as evidenced by the pictures of the prevailing red and yellow sects which are filled with representations of the three eyed destroying Shiva, and of his blood drinking consort; the three eyed goddess Trilochna.

97. The great mass of the people of Ladákh are all of one race or caste, they intermarry and eat together and are all eligible as members of the national priesthood. But in the Northern Provinces of Ladákh numerous clans called Boni or low which include all the dancing women and their attendant musicians, all smiths and carpenters and in fact handicraftmen of every kind.

98. In Leh itself there are small colonies of Kashmíris whose connection with the native Bhots has produced a mixed race called Argon.

99. Christians.—Christians number 218, of whom 113 were males and 105 females—

	Total.	*Males.*	*Females.*

Total	218	113	105	68	35	33	84	40	44	52	29	23	14	9	5

104. Non-Asiatics represent 62 per cent, Eurasians, 2 per cent, and Natives, 36 per cent. of the total Christian population, of these the Church of England represents 83 per cent. Roman Catholics 7 per cent. while the other sects do not call for special notice.

105. The proportion of age periods is as follows :—

	0—14.	15—34.	35—49.	50 and over
Non-Asiatics	28 per cent.	38 per cent.	26 per cent.	8 per cent.
Eurasians	60 „	40 „	...	...
Natives	35 „	39 „	22 per cent.	4 per cent.
Total ...	31 per cent.	40 per cent.	23 per cent.	6 per cent.

106. The sexes of Non-Asiatics are equal, of Eurasians, males represent 40 and females 60 per cent. and of Natives 55 and 45 respectively.

107. The following statistics have been prepared for Europeans and Eurasians only :—

CIVIL CONDITION.

	Age Distribution.																	
	Total.			0—19.			20—29.			30—40.			50—59.			60 and over.		
	Total.	Males.	Females.	Total.	Males.	Females	Total.	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.
Unmarried ...	76	37	39	42	19	23	20	10	10	14	8	6	...	...	...	...	...	...
Married ...	58	30	28	...	...	...	10	1	9	40	22	18	7	6	1	1	1	...
Widowed ...	5	2	3	...	..	...	...	...	...	2	1	1	2	...	2	1	1	...
Total ...	139	69	70	42	19	23	30	11	19	56	31	25	9	6	3	2	2	...

108. The relative proportion of civil condition to total population is :—

Unmarried	54
Married	42
Widowed	4

Of 42 persons under 0—19 years, 36 or 85 per cent. were under 10 years, married life commences after 19, and the highest percentage is obtainable in 30—49, the number representing that age being 40 out of 58 the total of married persons.

109 Widowed persons numbered only 5, 2 males and 3 females, the former comprising one between 30 and 34 and the other, 60 and over, and the latter one between 35 and 39 and the remaining two between 50 and 59.

110 Education by Religion and Age.—Of the total population of Europeans and Eurasians, 14 or 10 per cent. are returned as learning, 104 or 75 per cent. as literate, and 21 or 15 per cent. as illiterate.

111. The illiterates are all under 0—14 years, learning also under 0—14, and literate above that age.

112 The age returns show 29 to be 0—4 years old, so that the number shown as illiterate, not only appears to be correct but affords *prima facie* evidence of the fact, that education is not neglected.

113. Parent tongue.—With the exception of one female whose mother tongue is returned as Hindustani, the group of languages exhibits the following results :—

English	124
English and French	1
English and Italian	2
French	5
Dutch	1
German	5
Total ...	138

The English speaking population being 91 per cent. of the whole.

114. Parsis.—Parsis represent a very small section of the community, their number being one male in Jammu, and six males and two females in Kashmir.

CHAPTER IV.

Ages of the Population.

115. I now proceed to examine the specified periods of the Census Returns. It is difficult to elicit from the people a correct return of age, more particularly, the ages of the female population. The Ladákhís are said to make use of the cycle of twelve years for common computations such as a man's age, and it is difficult to say if ages under 12 were correctly given to the enumerators. The Miáns and other high families whose women are subject to the Pardah system were naturally averse to any enquiry being made in respect of age of females. Some of them distinctly refused to help the enumerators, while others who were more complacent, gave information of questionable reliability. Again the age periods of 0—1 and 1 years, must have been confounded, because calculations in this respect are scarcely ever correct in an uneducated community.

116. The following tables show the Divisional periods of age for the whole State and its provincial rural and urban Sub-divisions :—

ALL RELIGIONS.

	Under 5.			5—9.			10—14.			15—19.			20—24.			25—29.			30—34.

116. Speaking generally it appears:—

(1).—That the ratio of females per 10,000 is higher than that of males in each of the age periods between 0-5.

(2).—That at the age of 5-9 the inequality between males and females is reduced to a minimum, while at the age of 10-14, there is an abrupt rise in the number of males with a corresponding decrease in females.

(3)—That between the age periods of 15 to 34, there is again a preponderance in the ratio of females, as compared with males, the only exception being in the Urban population of Jammu Province and the Rural Frontier Districts of Ladákh, Skardu and Gilgit, in which notably in the former, the proportion of males is in excess of females.

(4).—That between 35 and 44 the ratios vary most irregularly.

(5).—That in the subsequent age periods, the ratio of males again shows generally a marked increase, compared with that of females, the only exceptions being in the Urban population of Jammu and Frontier Districts of Ladákh, Skardu and Gilgit.

117. The subjoined table shows the difference between the proportions per 10,000 of males and females at each age period :—

119. These figures prove that generally speaking, the condition of the population of the Kashmír State bears a normal comparison with other Indian Provinces.

120. The ratio per 10,000 of males and females at each age period in the Kashmír State, contrasted with other Provinces, stands as below :—

At each age period between 0—5 years, the Kashmír ratio as well as those of other Indian Provinces are similar so far that the ratio of females is generally higher than that of males, but Kashmír presents certain peculiarities which require special mention, *viz.* :—

At 0—1, the Kashmír ratio of females is higher than that of each of the Indian Provinces cited above, the nearest approach to it being in Ajmere.

At 1, it is lower than all the Indian Provinces.

At 2, it is higher than Ajmere and Central Provinces, extremely lower than Sindh, and slightly lower than Assam and Berar.

At 3 and 4, it is again higher than all the Indian Provinces.

121. The apparent deductions from these statistics are :—

(1).—That births in Kashmír are more numerous than in other Indian Provinces.

(2).—That deaths between 0—2 years in Kashmír are more numerous than in other Indian Provinces.

(3).—That the vitality of children between 2—4 years is more favorable in Kashmír than in other provinces.

(4).—That as in Kashmír, so in other provinces, the increase in the ratio of females is reduced to a minimum at the age of 4, accounted for by the admitted fact that female children are not properly taken care of, and therefore die in greater numbers than males ; at the age period of 5—9 the ratio of females in Kashmír is higher than that of males, being slightly lower than the age period immediately preceding it, but singularly enough, the corresponding ratios in other Provinces vary considerably, there being an abrupt rise in the ratio of males, in India, Assam, Sindh and Central Provinces, so that the only Provinces maintaining the increased proportion of females, are Ajmere and Berars. This is mainly attributed to climatic influences and the consequent ravages of small-pox, the effects of which are obviously more injurious to females than males. The abrupt rise in the ratio of males as compared with females at the age of 10—14 and its continuity at the subsequent age period of 15—19 which is perceptible throughout Kashmír and the Indian Provinces, is a problem well worth examination and solution. We have proved that there are greater female births than male births, that more or less, the increase in females continues uniformly till the age of 5, and that at the subsequent age period (5—9), there is a susceptibility of increase in the ratio of males, because that is the age when children are generally affected by small-pox and other fatal diseases, and the negligent treatment of female patients appear to account satisfactorily for the corresponding increase in proportion of males, but it is impossible to apply this proposition to the age periods of 10—14 and 15—19, at which female lives undoubtedly become as valuable as male lives. I have given the subject very careful consideration, but in the absence of the Census Reports of other Provinces, can only suggest that early consummation of marriage and premature child birth probably accounts for the loss of female life at these age periods.

The increase in the proportion of females at the age periods between 20—34 and 40—44 is attributed to absence of able bodied males on employment in the Punjab and elsewhere.

On the other hand, the increased ratio in males at age periods between 45 and 60 and over, is due to greater longevity in males than in females.

122. Assuming the figures under one year as representing approximately the births during twelve months, the difference between each subsequent period shows approximately the ratio of deaths every year. This proposition is based on the theory that supposing the population to have remained stationary, those returned under 4—5 years ought to have been at least as numerous as those now under one year. The Census being taken in February . 1891, and the State year commencing on 11th April, it follows that those returned under one year, were ten months old ; add to this the average for two months obtained by dividing the figures under one year by five, we have the following, as representing approximately the average births that take place during a year of 12 months. Calculated at this rate, the ratio of births per ten thousand of the male and female population is :—

	Total Births.			Total under 5.			Average annual Population			Average Deaths.		
	Both sexes.	Males.	Females.	Both sexes.	Males.	Females.	Both sexes.	Males.	Females.	Both sexes.	Males.	Females.
Jammu Urban	411	370	472	1,207	1,067	1,439	241	213	288	170	157	184

Total Kashmír Province ...	654	623	689	2,005	1,921	2,099	401	384	420	253	239	269
Frontier Districts	269	235	303	1,119	1,021	1,226	224	204	245	45	31	58
Urban whole State	510	478	551	1,488	1,371	1,633	299	274	326	211	204	225
Rural Do.	541	508	578	1,702	1,613	1,802	340	322	360	201	186	218
Total whole State	538	506	577	1,685	1,594	1,789	337	319	358	201	187	219

The above figures are by no means so reliable as could be desired, because in calculating the average births no allowance has been made for the deaths which must have taken place during the year of enumeration, the figures returned under one year representing the net results of the ten months immediately preceding the night of Census ; yet they may be held as approximately giving an idea of the reductions which take place during the period of infancy from 1 to 5 years, and nothing more deserves the attention of the statistician than to observe with regret that more than half of our children after birth, and nearly one-third after attaining the age of one year, are annihilated from various causes, the majority of which it is within human energy and foresight to avoid with moderate yet certain success.

123. The averages returned above show as a fact that there are more deaths among female infants than among males, that the mortality is rather high in the Kashmír Province than in Jammu ; compared with other Provinces in India we have :—

	Total Births.			Total under 5.			Average annual Population.			Average Deaths.		
	Both sexes.	Males.	Females.	Both sexes	Males.	Females.	Both sexes.	Males.	Females.	Both sexes.	Males.	Females.

124. Comparing the ratios returned for the various divisions of the State there are fewer births and larger deaths in the Urban than in the Rural population, that the averages of Jammu Province are generally lower than those of Kashmír, that the lowest ratio is obtained in the Frontier Districts, but the vitality there appears to be better than that of any other part of the State.

Christian infants have the highest percentage, but considering that they number only 218, it is rather premature to draw any conclusions regarding them.

125. Before comparing the ratio returned for religious divisions, it may be remarked that there is only one Hindu infant of three years in Ladákh, and none in Skardu and Gilgit, that the population of Ladákh is generally Budhistic, while that of Skardu is almost Mohamedan, there being only 304 infant Mohamedans in Ladákh and 20 Budhist infants in Skardu. While therefore the normal standard of Hindu and Mohamedan population is obtainable for the purpose of comparison, only in Jammu and Kashmír, it would be as well to compare the Mohamedan and Budhist population of Ladákh and Skardu, leaving out Gilgit Road which represents the floating population brought about by the Public Works Department.

126. It will be seen :—

(1).—That in the case of both Hindus and Mohamedans the ratio of infants in the Urban population, is decidedly lower than the Rural population, and that the highest percentage is obtained in the Rural District of Kashmír.

(2).—That the ratio of Hindu infants is invariably lower than that of Mohamedan infants in both Jammu and Kashmír.

(3).—That the ratio of Mohamedan infants in Skardu is lower than that in the Rural District of Jammu and the whole Province of Kashmír.

(4).—That the ratio of Mohamedan infants in Skardu is more close to Hindu infants in Jammu District and lower than those in Kashmír Province.

(5).—That the ratio of Budhist infants in Ladákh is almost alike in Jammu and Skardu, and is the lowest, compared with that of Mohamedans.

(6).—That the ratio of Budhist infants in Ladákh and Skardu, is much lower than that of Mohamedans in those Districts.

(7).—That the above differences in ratios among Hindus and Mohamedans are due to climatic influences, to mode of life, and in the case of Budhists, to polyandry.

The year immediately preceding the Census seems to have been a very bad one, for Batála and Punch in Jammu, and Sopore and Bárámula in Kashmír The loss of infant life in these towns would appear to have been very considerable.

The birth rate of Jammu city appears to be nearly half of that of Srinagar; of all the towns in the State, Sopore and Barámula have the highest birth rate, the increase being particularly in the Mohamedan population.

The disparity between males and females under 5 years is highest in Jammu representing an excess of 418 per 10,000 in females. It is chiefly in the population of Hindus, including Jains and Sikhs.

HINDUS INCLUDING JAINS AND SIKHS.

127. Repeating the process referred to in para. 122, the rates of births and deaths by religions are shown in the subjoined table:—

	Annual Births per 10,000.			Total under 5.			Average Annual Population.			Average Deaths.		
	Both sexes.	Males.	Females.	Both sexes.	Males.	Females.	Both sexes.	Males.	Females.	Both sexes.	Males.	Females.
Hindús, including Jains and Sikhs...	423	395	457	1,315	1,227	1,419	263	245	284	160	150	173
Mohamedans ...	596	561	632	1,861	1,770	1,961	372	354	392	224	207	240
Budhists ...	200	179	222	841	815	869	168	163	173	32	16	49

128. These figures show that the rates of births and deaths per 10,000 is largest among Mohamedans, that there are fewer births and fewer deaths among Hindús than among Mohamedans, that the lowest ratio of births is obtained in Budhists, but at the same time the rate of mortality there, is also extremely low.

129. Christians numbering only 218, the majority of whom were visitors to the valley, it is premature to draw any conclusions regarding them. The same remark applies to Parsis, who number only 9 in all.

URBAN POPULATION WHOLE STATE.

131. The proportion of children to the total population is largest in the rural population of Kashmír, being 4,463 per ten thousand and lowest in the urban population of Jammu. Contrasted with other provinces the figures are :—

Kashmír Rural	4,463
Do. Province	4,363
Assam	4,148
Sindh	4,091
Central Provinces	4,069
Whole State Kashmír (Rural)	4,043
Whole State, Kashmir	4,006
India	3,888
Jummu (Rural)	3,896
Jummu Province	3,863
Kashmír (Urban)	3,802
Berar	3,782
Whole State Kashmír (Urban)	3,590
Ajmere	3,562
Frontier Districts (Ladákh, Skardu and Gilgit)	3,168
Jummu (Urban)	3,030

132. The proportion of male children to total male population on the other hand is :—

Berar	3,719
Kashmír Rural	4,471
Kashmír Province	4,369
Urban population whole State Kashmír	3,499
Assam	4,190
Sindh	4,146
Central Provinces	4,142
Rural population whole State	4,022
Total population Kashmír State	3,981
India	3,964
Rural population Jammu Province	3,867
Jammu Province	3,820
Urban population Kashmír Province	3,797
Ajmere	3,578
Frontier Districts (Ladákh, Skardu and Gilgit)	3,081
Urban population Jummu Province	2,835

and of females—

Rural population, Kashmír	4,452
Total population, Kashmir Province	4,354
Assam	4,103
Rural population, whole State	4,063
Total do. do.	4,036
Sindh	4,026
Central Provinces	3,997
Rural population, Jammu Province	3,929
Total do. do. do.	3,911
Berar	3,850
Urban population, Kashmír	3,812
India	3,809
Urban population, whole State	3,703
Ajmere	3,562
Urban population, Jammu	3,352
Frontier Districts (Ladákh, Skardu and Gilgit) ...	3,266

133. Contrasting the proportions of boys with girls we find :—

Excess in proportion of females as compared with that of males.	Urban population, Jammu Province ...	517
	Total do. do. do. ...	91
	Rural do. do. do. ...	62
	Rural population, whole State ...	41
	Total do. do.	55
	Berar	131
	Urban population, Kashmír State ...	15
	Frontier Districts (Ladákh, Skardu and Gilgit)	185
	Urban population, whole State ...	204
Excess in proportion of males as compared with that of females.	India...	155
	Central Provinces	145
	Sindh	120
	Assam	87
	Rural population, Kashmír Province ...	19
	Ajmere	16
	Total population, Kashmír Province ...	15

134. The result of these statistics is :—

(1). That the ratio of children of both sexes per 10,000 of total population.

(*a*) for the whole state is lower than Assam, Sindh and the Central Provinces by 142, 85, and 63 respectively, and higher than India, Berar and Ajmere by 118, 224 and 444 respectively.

(*b*) for the whole Rural population, lower than Assam, Sindh and the Central Provinces by 105, 48, and 26 respectively, and higher than India, Berar and Ajmere by 155, 261 and 481 respectively.

(*c*) for the whole Urban population, lower than Assam, Sindh, Central Provinces, India and Berar by 558, 501, 479, 298 and 192 respectively, and higher only than Ajmere by 28.

(*d*) for Rural population Kashmír Province higher than :—

Assam	by	315
Sindh	„	372
Central Provinces	„	394
India	„	575
Berar	„	681

140. The disparity between the ratios of males and females, the excess difference being in favor of females, at 0—5—is more marked in Jammu City and in the Urban population of Jammu Province generally and is less marked in Srinagar City and in the Urban population of Kashmír Province generally. In the Rural population it is nearly half of the Urban population in Jammu Province, and on a par with the Urban population in Kashmír Province, and is more marked in the Frontier Districts.

141. By religions it is generally higher in Hindus than Mohamedans in the Urban population and lower in Hindus in the Rural population, excepting the Frontier Districts in Kashmír Province.

At 5—9.—It is nearly half of that in the preceding period in the Urban population, and is almost reduced to a minimum in the Rural population.

In the Urban population, Hindus show an excess in the whole State, Kashmír Province and Srinagar City; and Mohamedans in Jammu Province and Jammu City, and in the Rural population it is more marked in Hindus than in Mohamedans.

At 10—14.—The abrupt rise in the ratio of males, as compared with that of females, is more prominent in the Urban and Rural population of Kashmír, and less so in the Urban and Rural population of Jammu, the disparity between Hindus and Mohamedans not being very considerable.

142. These statistics prove :—

(1).—That at the age of 15—19, and subsequent periods, female life is not subject to loss, at the high rates prevailing in anterior periods.

(2).—That the high ratios in males between the age periods (20—59) in the Urban Province of Jammu generally, is influenced by the resort to cities of adult males for purpose of trade, while in the city of Jammu which is the most important town in the Province, it might also be attributed to the presence of the Chief and his staff, as well as to troops and the Civil Establishments at head-quarters. This deduction is borne out by comparing the proportions returned for the Urban and Rural population of Jammu.

(3).—The proportions of Kashmír Province and Frontier Districts, notably Skardu on the other hand, (see age periods 20—39) show an excess in females, which is accounted for by the absence of adult males for employment in the Punjab during the winter. These remarks apply equally to the Urban and Rural population.

(4).—The high ratios in subsequent age periods in males, are due to longevity which is greater in males than females.

143. Average number of females to 1,000 males at each age period.

Comparison with other Indian Provinces.

146. At 0—5 years, the disparity between Mohamedan males and females, is not so considerable as it is among Hindu males and females, but the subsequent age period of 5—9 presents a quite contrary aspect.

147. The only place where the average of Hindu females to every 1,000 males exceeds one thousand at 0—5 years, is the Urban population of Kashmír and the Rural district of Ladákh. Mohamedan females on the other hand are equal to males in Jammu Province and higher than males in the Rural population of Jammu, Urban population of Kashmír, and in Ladákh and Skardu, the highest average being obtained in Skardu which returns 1,123 females to every one thousand males.

148. Compared with Hindus and Mohamedans, Budhist females have a very high average at 0—5 years, particularly in Skardu where there are 2,333 females to every 1,000 females :—

The towns of Mirpore, Srinagar and Sopore return a high average of females, the excess being particularly in the Mohamedan population :—

MARRIAGEABLE LIFE.

15—19 ...	580	656	662	750	787	955	431	671	735	841	1,000	795	1,094	864	683	1,065

149. It is difficult to fix the period of marriageable life, and the statistics of civil condition have not been prepared during the present Census, so as to give an idea of the number of single and married males and females at these age periods—marriages in the hilly tracts generally take place at or after the age of 9, and the numbers of the population at the two subsequent age periods at least, serve to show the extent to which wives are obtainable by the male population without resorting to other parts for matrimony.

150. It appears that young women are more numerous in Ladákh than in any other part of the State, that they are fewer in the Urban population of Jammu than in the Urban and Rural population of both Jammu and Kashmír.

151. For the whole State there appear to be about 300 males per mille in the Urban and 200 in the Rural population, whose condition of celibacy is due to want of females, the want being particularly traceable to Hindus in the towns of Jammu, Batála, Punch and Srinagar.

152. The figures for Budhists are given below :—

	Whole State.	Jammu.	Ladákh.	Skardu.
10—14	930	847	954	667
15—19	1,017	1,236	978	500

With the exception of Skardu, the Budhists are generally better off than Hindus and Mohamedans in their comparison of young women with young males.

30—34 ...	435	444	1,061	720	1,258	920	405	644	919	1,013	827	925	737	886	1,138	954
35—39 ...	408	326	965	622	1,009	881	344	523	646	853	250	806	622	792	519	992
40—44 ...	458	529	896	714	980	1,029	324	730	907	1,050	537	944	742	1,000	708	1,026
45—49 ...	390	468	667	800	1,139	613	233	491	584	678	484	743	857	814	368	429

153. An examination of these statistics establishes a remarkably interesting point in connection with the movement of the male population as will appear from the following facts :—

(1).—That for the whole State females outnumber males at the age of 20—24 by 33 per mille, and at subsequent periods show a gradual decrease till at the age of 45—49 when there are only 715 females to every one thousand males, the said gradual decrease being more marked in Hindus than Mohamedans.

(2).—That this irregular rise and fall in numbers is perceptible with rare exceptions throughout the Rural population of both Jammu and Kashmír and the Urban population of Kashmír, the highest figures at 20—24 being :—

1,052 Rural population Whole State.
1,042 Ditto Jammu Province,
1,062 Ditto Kashmír do,
1,019 Urban population Kashmír Province.

and the lowest at 45—49 being :—

727 Rural population Whole State.
693 Ditto Jammu Province,
679 Ditto Kashmír do.
651 Urban population Kashmír Province.

(3).—That the Urban population of Jammu Province with one exception at age period (35—39) shows a singular falling off in females, the highest number being only 600 at (20—24) and the lowest 479 at (45—49) to every one thousand males.

(4).—That there is no perceptible rise or fall in Ladákh, the average being 941 at 20—24 and 984 at 45—49.

(5).—That in Skardu the average number of females to every 1,000 males, shows a marked increase in females which is not met elsewhere at age periods 20—24, 35—39 and 45—49.

(6).—Contrasted by religions, the decrease in the average of females to every one thousand males, is found in both Hindus and Mohamedans, but more prominently in the former.

(7).—That the abnormal decrease in females in the Urban population of Jammu Province is conclusively traced to the towns of Jammu and Punch, the other towns keeping pace generally with the Rural population, notably the town of Mirpore the averages of which are generally higher than it.

154. The figures for Budhists are given below:—

	Whole State.	Jammu Province.	Ladákh.	Skardu.
20—24	967	977	973	500
25—29	1,012	1,240	967	1,000
30—34	992	1,074	986	250
35—39	990	984	996	615
40—44	983	1,095	963	1,600
45—49	968	845	992	667

and prove generally that the population is stationary.

155. The above affords convincing proof of the propositions stated in paragraph 90 of this report, *viz.*:—

(*a*) That an unusually large number of able-bodied males reside in the towns of Jammu and Punch as State employés in the Civil and Military Departments, and consequently the average number of females to every 1,000 males is extremely low.

(*b*) That in the town of Mirpore the high ratio of Hindu and Mohamedan females is due to the absence of males on employment in other parts of the country.

(*c*) That the Mohamedan population of Kashmír and Skardu seek employment in the Punjab during the winter months.

156. These figures show that the general vitality, and consequently the period of longevity of females in this State, is better in the Rural than in the Urban population, that it is more satisfactory in the cold climate of Ladákh than in any other part of the State, excepting of course the town of Mirpore where the average of Mohamedan females is the highest.

157.—The subjoined table elicits another interesting point in connection with age. Dividing the population equally, that division is made at the following age; the numbers under and over being nearly equal:—

	Males.	*Females.*
Whole State, Rural Population	21 63	20 96
Do. Urban do.	22 5	21 46
Jammu Province Urban	25.8	23 11
Do do Rural	22·27	21 45
Total Jammu	22 4	21 5
Kashmír Province, Urban	21 3	21·005
Do., Rural	20 11	19 19
Total Kashmír	20 26	19 9
Ladákh	28 96	28 76
Skardu	20 66	20 35
Gilgit	37 5	24·00

158. If we divide our people into classes, the results are found, as follows:—

Hindu males	23 97
Do females	22 93
Mohamedan males	20 61
Do. females	20 1
Budhist males	28 67
Do. females	28·55

159. We have now to deduce an average age for our population.

In the following table are given the different periods, the average age for each, and the living numbers, with the sums of their years; and dividing the sums of all by 25,27,046 our total population, we get 24 26 years as the average age for each person in the Province. For males it is 24·26 and for females 22·48, higher in males by 1·78 of a year or 1 year 9 49 months:—

Age periods	Mean age for each period.	Population enumerated.	Sum of years
0—9	4½	7,88,842	35,49,789
10—24	17	6,39,830	1,08,77,110
25—39	32	5,64,301	1,80,57,632
40—44	42	1,61,436	67,80,312
45—59	52	2,23,332	1,16,13,264
60 and above	70	1,49,305	1,04,51,350
		*25,27,046	6,13,29,457
		* excluding unspecified (16,906)	

6,13,29,457 ÷ 25,27,046 = 24 26.

160. In the North-Western Provinces the average age of the population is 23 years, in Madras it is 22·27, in Bombay 22·36, and in Central Provinces 21·59, the mean for the four Provinces approximates to that for this Province.

161. Compared with the English average (32·1) ours is lower by 7·84, which means that death-rate is higher in India in the advanced periods, and life is consequently of shorter duration.

162. For the Urban and Rural population the average age is as given below :—

	Total Population.		Average.	
	Males.	Females.	Males.	Females.
Urban Population, Jammu.				
Jammu City	22,545	11,997	27·19	22·99
Batála do.	3,079	2,127	21·51	23·55
Mirpore do.	3,655	3,598	22·53	23·51
Punch do.	4,675	2,814	25·76	22·83
Total Jammu, Urban	33,954	20,536	25·80	23·11
Urban Population, Kashmir.				
Srinagar City	62,720	56,240	21·45	21·18
Anantnág do.	5,515	4,712	20·83	20·55
Sopore do.	4,360	4,050	20·11	19·66
Bárámula do.	3,003	2,653	20·94	20·35
Total Urban, Kashmír	75,598	67,655	21·30	21·005
Total Urban, Whole State	1,09,552	88,191	22·50	21·46
Jammu (Rural)	7,36,287	6,48,766	22·27	21·45
Kashmír (Rural)	4,26,747	3,79,041	20·11	19·19
Frontier Districts	80,643	74,725	25·08	23·73
Total Rural, Whole State	12,43,677	11,02,532	21·63	20·96
Grand Total	13,53,229	11,90,723	21·70	20·99

163. There is another point which is equally interesting, *viz.*, that of life expectancy, or the average duration of Native life.

Age periods.	Duration of each period.	Population.	Average annual population.	Decrease per year.
0— 9 ...	9	7,88,842	87,649	41,947
10—24 ...	14	6,39,830	45,702	5,395
25—39 ...	14	5,64,301	40,307	—52
40—44 ...	4	1,61,436	40,359	24,407
45—59 ...	14	2,23,332	15,952	8,487
60 and over ...	20	1,49,305	7,465	7,465
Total ...	...	* 25,27,046 excluding unspecified (16,906)	...	87,701—52=87,649

164. The total annual mortality for the whole State is, therefore, 87,649, being highest at the age of 0—9 and 40—44.

The sum of the last column gives 34·68 as the death-rate per mille per annum on the total population of both sexes, for males 34·68, and for females 34·68, the average duration of life coming to 25·98 years, as will be seen from the subjoined table :—

Age periods.	Mean age for each period.	Computed deaths.	Sum of years.
0—9	4½	41,947	1,88,761
10—24	17	5,395	91,715
25—39	32	—52	—1,664
40—44	42	24,407	10,25,094
45—59	52	8,487	4,41,324
60 and over	70	7,465	5,22,550
	Total ...	87,701—52=87,649	22,67,780

$\frac{22,67,780}{87,649} = 25{\cdot}98.$

165. Our life expectancy is as follows:—

	Males.	*Females.*
Jammu	22·4	21·5
Kashmír	20·26	19·9
Ladákh	28·96	28·76
Skardu	20·66	20·35
Urban Population, Jammu	25·8	23·11
Do. do., Kashmír	21·3	21·005
Rural Population, Jammu	22·27	21·45
Do. do., Kashmír	20·11	19·19
Urban Population, Whole State	22·5	21·46
Rural Population, Whole State	21·63	20·96

CHAPTER V.

Birth-place.

166. The subjoined table shows the distribution of the population according to Birth-place :—

	Total.	Males.	Females.	*Percentage on total population.*

Africa	2	...	2	...	...	...
Unspecified	16,896	10,206	6,690	0·6	0·4	0·2
TOTAL ...	25,43,952	13,53,229	11,90,723	100·0	53·3	46·7

167. Persons born within the State represent 96·6 per cent. or including the unspecified population of Gilgit (16,615) 97 per cent. nearly.

168. The population due to immigration is 86,153, or 3.4 per cent., or excluding Gilgit 3 per cent., of whom 44,481 are males, and 41,672 females; of this the Punjab, and the adjoining Native States of Kapurthala, Patiála, Chamba, Sarmore and Biláspore contribute 65,108, or 2·56 per cent., the remainder being distributed as follows :—

	Total.	Males.	Females.
British India	1,027	799	228
Feudatory States	17	10	7
Yagistán (Chitral)	1,183.	711	472
Nepál	1,001	904	97
Afghánistán	745	625.	120
Other countries adjacent to India	61	50	11
Remote from India	42	37	5
Europe	71	42	29
Africa	2	...	2
Unspecified	16,896	10,206	6,690

169. The movement of the population from the Punjab into this State is more considerable in Jammu than in Kashmír, the figures in the former being 28,275 males and 32,598 females, total 60,873; and in the latter 2,501 males, 1,180 females, total 3,681. This is apparently due to the close proximity of Jammu Province to the Punjab Districts of Siálkot, Gujrát, Jhelam and Ráwalpindi, and to the consequent frequency of inter-marriages, trade and employment in the State.

170. The subjoined table gives proportion per mille to total population and the average number of females to every 1,000 males by provinces :—

	Males.	Females.	Average number of females to every 1,000 males.
Jammu	535	465	868
Kashmír	529	471	889
Ladákh	508	492	970
Skardu	508	492	966
Gilgit	608	392	644
Whole State	532	468	879

The disparity is prominently noticeable in Gilgit owing to the presence of troops, and to some extent in Jammu and Kashmír, in consequence of State Establishments and the floating population; but there could be no doubt that on the whole, there is an excess of 120 per mille in males over females. A comparison of the relative figures of the aboriginal population with immigrants from other countries, gives the following results :—

171. The aboriginal inhabitants, or in other words, those born within the State, muster 24,57,799, of whom 13,08,748 are males, and 11,49,051 females; the relative proportions being—

Males	533	per mille.
Females	467	,,
Average number of females to every 1,000 males	877	,,

172. The figures for the outside or Foreign population stand as below :—

Total.	Males.	Females.	*Proportion per mille.* Males.	Females	*Average number of females of every* 1,000 *males*
86,153	44,481	41,672	516	484	937

173. The details by provinces are as follows :—

	Aboriginals.			*Outside Population.*			Proportion per mille. *Aboriginals.*		*Foreign.*		*Average number of females to* 1,000 *males.*	
	Total.	Males.	Females.	Total.	Males.	Females.	Males.	Females.	Males.	Females.	Aboriginals.	Foreign.
Jammu ...	13,76,183	7,40,118	6,36,065	63,360	30,123	33,237	537	463	476	524	859	1,103
Kashmír ..	9,43,273	4,98,424	4,44,849	5,768	3,921	1,847	528	472	680	320	892	471
Ladákh ...	28,087	14,176	13,911	187	174	13	505	495	930	70	981	75
Skardu ...	1,10,123	55,899	54,224	202	199	3	507	493	985	15	970	15
Gilgit ...	Statistics not collected.											

The disparity in Ladákh and Skardu compared with Jammu and Kashmír, is comparatively slight owing to scanty migration to other parts of the country. The foreign element in the State is largest in Jammu, representing 46 per mille. In Kashmír and Ladákh it is only 6 per mille, and in Skardu nearly two per mille. The coldness of the climate, difference in social and religious ceremonies and the hardship caused by intervening mountains, accounts for the fact that native immigrants to Ladákh and Skardu are not accompanied by their families. The immigrants in Ladákh are mostly traders and missionaries, not to speak of a few State servants, while in Skardu they are mostly servants of the State.

174. The total number of Europeans, including those born in Africa, is returned as 42 males and 31 females, of whom 31 males and 28 females were British-born, as detailed below :—

	Total.	Males.	Females.
England	50	27	23
Scotland	5	3	2
Wales	1	...	1
Ireland	3	1	2
Total	59	31	28

175. The details for other European countries are as follows :—

	Total.	Males.	Females.
France	3	3	...
Holland	1	1	...
Italy	3	3	...
Portugal	2	2	...
Germany	3	2	1
Cape Colony	1	...	1
Africa (unspecified)	1	...	1
Total	14	11	3

176. The Asiatic element comprises 99·997, and the non-Asiatic ·0003 per cent. of the total population.

CHAPTER VI.

Castes.

177. The following information is taken from the standard form prescribed by the Census Commissioner :—

Class.	Hindus.	Sikhs.	Jains.	Total.	Mohamedans.	Gilgit district not enumerated.	Total strength.
A. Agricultural	3,07,049	370	...	3,07,419	6,48,915	...	9,56,334

Grand Total ...	...	...	593	...	...	...	...	593

180. The total population of Hindus (including Sikhs and Jains), Mohamedans and Budhists being 25,27,110, the relative proportions of castes are :—

Class.	Total percentage.	Hindus; including Jains and Sikhs.	Budhists.	Mohamedans.
A. Agricultural	38·00	12·20	...	25·8
B. Professional	26·46	9·8	...	16·66
C. Commercial	3·94	1·88	...	2·06
D. Artisans and Village Menials	12·24	3·84	...	8·4
E. Vagrant Minor Artisans and Performers	·18	·04	...	·14
F. Races and Nationalities	19·00	...	1	18
G. Unspecified	·18	·04	...	·14
Total ...	100	27·8	1	71·2

181. The above classification of castes is by no means accurate. The occupation tables return 17,62,843 as agriculturists, whereas the caste returns show only 9,56,334. The anomaly is attributed to the fact, that in the Rural population, all classes whether professional or others, with few exceptions, devote themselves to agriculture, either as their sole occupation, or in addition to other occupations. The following gives a detail of castes generally employed in agriculture, with special reference to the figures returned in the occupation tables. It would be more convenient and accurate, if the standard form of the Imperial return of castes was modified, as at present the classification of castes by occupation appears to be grossly misleading, while in a statistical point of view, such classification hardly gives a clear insight into the complicated system of castes, its origin, and development

183. I now proceed to deal with each caste separately.

1. Brahmans (also Agricultural)	505,086
Jammu	182,643
Kashmír	321[illegible]
Ládákh	184
Skardu	271
Gilgít Road	3

184. The main sub-divisions of Brahmans have not been returned for want of the necessary column in the Enumerator's Schedule, but in a future census of the Kashmír State an enquiry on the lines hereinafter laid down will be interesting, not only in a statistical, but also in an ethnological point of view.

185. The Brahmans in this State are divided into three classes, *viz.* :—

1.—Immigrants from Panjab and other parts of India strictly following their ancient regulations as regards marriage, social union, &c.

2.—The aboriginal Brahmans of the hills known as "Dográs."

3.—The Brahmans of Kashmír.

186. The immigrants from the Panjab and other parts of India are mostly Saraswat and Gour Brahmans who are strictly governed by the rules and regulations of their caste and clan, and nothing further need be said about them, except that they neither eat with the other two classes nor inter-marry with them.

187. The aboriginal or Dográ Brahmans of the hills comprise the following principal sub-divisions :—

Acharjí.	Pandit.
Bhatt.	Gulwadhe.
Bhadyal.	Gujrate.
Banotri.	Mangotri.
Phalgotri.	Kohol.
Parohit.	Raina.

With the exception of Acharjís and Gujrátís, who have suffered degradation by their avocation of presiding over funeral ceremonies, these castes stand on an equal footing with one another, but compared with Panjábi Brahmans, the Dográ Brahmans decidedly occupy an inferior status. Singularly enough the Kashmír Raina Brahmans have severed their connection with the Brahmans of Kashmír and intermixed with the Dográs, and are now considered a sub-division of Dográs. The local sub-divisions mentioned in the margin, are not found among the Brahmans of the Panjab.

188. The present population of Kashmír is composed of Hindus and Mohamedans, but the former have not, as a fact, the four *Varans* or caste sub-divisions prevailing in the Panjab ; they consist only of Pandits, Bohras, Jinsi-Sikhs and Dográs.

189. The Province of Kashmír excluding the District of Muzafferabad, has been the most remarkable seat, if not of the first, at any rate of the ancient colony of Aryan immigrants from Central Asia.

190. The popular tradition is that the Brahmans of Kashmír are in the direct line of descent from Kashap. They are divided into 133 *gotras*, named after the divine sages or ascetics by whom their clans are represented, though, as a matter of fact, the original *gotras* did not exceed 6, as noted in the margin, the remaining 127 *gotras* being due to inter-marriages or intermixture with other Brahmans. Some authorities give the principal divisions as only three, *viz.* :—Bhatt, Pandit and Rázdán from which are derived the distinctive appellations of Koul, Sopuri Pandit, and Raina. The Koul *gotra* is Dattatrye, the Sopuri Pandit, Pathdev Vasgargey, and the Rázdán (Raina) (1) Kanth Dhumayan, and (2) Sáman Mudhgale. From these three families gradually as each took to a distinct and particular trade or occupation or by adoption and inter-marriage, farther *gotras* came into existence and new castes were formed. According to another authority, the parent stock is represented by three brothers, Kayitachari, Mammatachari, and Ubbatachari. History further records that between the year 1435 and 1442 A. D., consequent on the slaughter by the Mohamedan conqueror of all but

Dattatrye.	Pathdev.
Bharadwaj.	Upmani.
Mudhgale.	Dhum.

eleven families of Kashmírí Pandits, excepting those who managed to escape from the country, those left behind assumed the tribal distinction of Malmas, while those who subsequently returned from the flight were called Banamasis. These two surnames, however, have reference to the astrological calendar observed by the two races, Malmas meaning the lunar and Banamas the solar months of the year, and it is difficult under the circumstances to regard these as race distinctions, unless the new settlers into the valley after the wholesale slaughter of 1435 A. D., observed the solar month as contra-distinguished from the aborigines whose calculations were based on the phases of the moon. This account may be taken for what it is worth, but there could be no doubt that the above distinctions did not interfere with inter-marriage or social position, till the reign of Sultan Zain-ul-Abdin, when the withdrawal of the interdiction against employment of Hindus in the State, encouraged the study of Persian, and enabled the Brahmans to aspire to high offices in the administration. It was then that they divided off into two parties known as *Karkun* and *Bachabat*, the former forming the laity, and the latter the priesthood. To enable this arrangement to be carried out, as all were equally Brahmans of the same status, the *Karkuns* made their daughters' sons their *Bachabats*. Later on, such of the *Karkuns* as relinquished the study of Persian and took to Sanskrit literature, began to be called "Pandits," but were not, for that particular reason, estranged from their fraternity. Among the *Karkuns* there is a class known as Bhattaraks who are said to be descended from royal blood, and the Rázdániks from the nobility.

The *Karkuns* strictly refrain from *Dan* (receiving charity), and do not, as a rule, take a wife from the *Bachabats*, in all other respects, irrespective of *gotra*, clan, caste or sub-division, they observe the same customs, religious rites, and are otherwise on perfect equality with one another. If any of them commit himself, or take up a lowering occupation, he is called *Dágí* (or stained), but does not forfeit any of his caste privileges. Trade and agriculture are looked upon as low, but this idea is gradually losing ground.

All Kashmírí Brahmans conduct their funeral and religious ceremonies according to the Nilmat Puran and according to the Vedas of Langak Rishi.

The Kashmírí Pandits are mostly *Shaktikas* or *Tantrikas*, their favorite goddesses being the *Khir Bhawani* and *Jawala Mukhi*, but they are also known as *Shaivas* and *Vaishnavs*. They unscrupulously eat food cooked in a boat rowed by Mohamedan boatmen, employ Mohamedans as water-bearers, and invariably wear a white turban on their head.

191. The subjoined statement gives an exhaustive list of the Kashmír *gotras* and clan subdivisions of *Karkun* and *Bachabat* Pandits :—

No.	Gotras.	Banamas or Malmas.	Castes.
1	Dattatrye (Koul)	Banamas ...	Koul, Nagari, Jinsi, Jalali, Watal, Nika, Sultan, Ugra, Aima, Moza, Bamzai, Dont, Tota, Sabih, Kissoo, Mandal, Singari, Rafiz, Babu, Darabi.
2	Upman	Malmas ...	Reyu.

OTHER KASHMIR CASTES.

192. Bohras.—This is a caste of Hindus, not being Brahmans, descended from the *Chhatri* stock, whose principal business is trade and shop-keeping. Having adopted the rites and ceremonies of the Brahmans, they are excluded from relationship with the Panjabi Khatris, and therefore inter-marry among themselves. It is not known when they originally settled in Kashmír, but from their customs and habits, it appears probable that they came into the country prior to the advent of the Mohamedans. There is evidence to show that in times gone by, they were freely admitted to caste among Pandits, as for instance, the reputable family of Chaudhri Mohesh, the builder of the nine masonry bridges in the Srinagar Dal and of the dry causeway across it nearly four miles in length, on which these bridges are situated. But with this notable exception, the Bohras do not appear to have been admitted to fellow-casteship in any manner with the Pandits. The Bohra woman, unlike the Pandits, does not wear a waist-girdle, while also unlike her, she does wear a nose-ring. In all other respects, the habiliments of the Bohra of both sexes, are undistinguishable from those of the ordinary Pandit. In general disposition they are closely assimilated with the *Dogra* and *Bakal* castes. The local *Purabeahs* are an off-shoot of this caste, whose general occupation is personal service.

193. Jinsi-Sikhs.—The Jinsi-Sikhs are Panjabi Brahmans. During the years 1751 to 1762 A. D., in the reign of the Emperor Ahmad Shah Durrani, Raja Sukhjiwan Subah of the Emperor, brought the Jinsi-Sikhs from Potowar and the adjoining hills to assist him in asserting his independence against his master. As these mercenaries were paid in kind, and had, in the time of the Maharaja Ranjit Singh, embraced Sikhism, they began to be called Jinsi-Sikhs, or Sikhs in receipt of rations. The Jinsi-Sikh is mostly found in the following portions of Kashmír territory, *viz.*, Parganahs-Tral, Hamal, Kirohan, Biroh and Ranbirsinghpora. They live by agriculture and personal service.

194. The Mians.—The settlement of Mians is due to *jagirs* conferred by Maharaja Gulab Singh on the *Dográ* Mians of Jammu, in Parganah Deosar, as a measure necessary for the preservation of peace in his newly-acquired territory.

195. Mohamedans.—Up to 1340 A. D. there was not a single Mohamedan in Kashmír. In 1341 Bulbul Shah, a Mohamedan ascetic of renown, came here from Turkistan *viá* Ladákh, and took up his habitation in a spot just below the Ali Kadal (fifth bridge of city Srinagar) where his mausoleum is held in great veneration. In those days Reinchan Shah, a Thibetan and Budhist whose original name was Ratanjbu, had been banished from his country while yet a youth, and sought the protection of Raja Udiandev king of Kashmír, who gave him an asylum, and assigned him a *jagir* to live in Parganah Lal. Meanwhile an expedition headed by Zukdar Khan marched into Kashmír, and Udiandev escaped the general slaughter which followed, by relinquishing his kingdom. Reinchan Shah who remained behind, forcibly married his Rani (known as the Kut Rani) and took possession of the kingdom.

Having been expelled from the fatherland in tender years, Reinchan Shah was naturally ignorant of the doctrine and ritual of his original faith, he offered to become a Hindu, but on his application being rejected by the Brahmans, Bulbul Shah prevailed on him to embrace Mohamedanism. It was in this manner that the Mohamedan faith first found its converts and adherents in Kashmír, who, under the auspices of a line of Mohamedan kings in general, and Sikandar (idol-destroyer) in particular, increased so steadily, that the country may now be said to be almost Mohamedan, the resuscitation of the Hindu community dating only from the days of Zain-ul-Abdin. The proselytes to Islamism in Kashmír were mostly from the original Hindu population, strangers and foreigners being but few, and this is the more patent from the fact that the present Mohamedan population is divided and sub-divided in accordance with the distinctions observable among their fellow-countrymen, though the lapse of years has slightly modified particular caste derivations, so as to make them unrecognizable by the light of previous custom. It has come to be recognized as a sort of analogy, that as the trade, occupation, or *habitat* of the person, so the peculiar affix to his name, as for instance, Aziz *Khar*, the *Khar* referring to the occupation of blacksmith, Sobhan *Chan*, or carpenter, then again Ramzan *Kakpúra*, from *Kakpur*, the name of the ancestral home, &c., &c.

Of course it must be expected that a certain proportion of the resident Mohamedan population comprise families whose progenitors or common ancestors had been foreigners, and although, as already observed, these are remarkably few, it is significant that they are up to the present even known as *bahar se ac'hue*, or foreigners.

196. The *Sheikhs* who are the convert class of Kashmír Mohamedans, as distinguished from the *Sayad*, *Moghal* or *Pathan* are the following castes, *viz.* :—

(1) *Pirzadas*, the descendants of *fakirs* (holy mendicants) and others of religious worth or sanctity, quite irrespective of their descent.

(2) *Baba Zadas*, or descendants of the *Khalifas* of Makhdum Sahib, whose shrine is considered the most sacred in the country.

(3) *Vains*, the original Mohamedans of Srinagar city, considered also the purest and of the best descent. These are sub-divided into castes, as follows :—

(1) Kânth, (2) Gúndrú, (3) Bachh, (4) Bándi, (5) Gúneh, (6) Gáni, (7) Dár, (8) Pakshivál, (9) Vakil, (10) Ashái, (11) Shál, (12) Kunru, (13) Ishlú, (14) Diwáni.

Of a lesser status among Mohamedans of Kashmír are the shawl-weavers and embroiderers and the zemindars of the country, and it must be remembered that those from among them who know Arabic are, in addition to their names, styled *Mullan*, *Vaiz* and *Maulvi*.

197. The principal Rajput sub-divisions returned are :—

			Hindus.	*Mohamedans.*	*Total.*
Hindus and Mohamedans	Manas	...	3,235	3,680	6,915

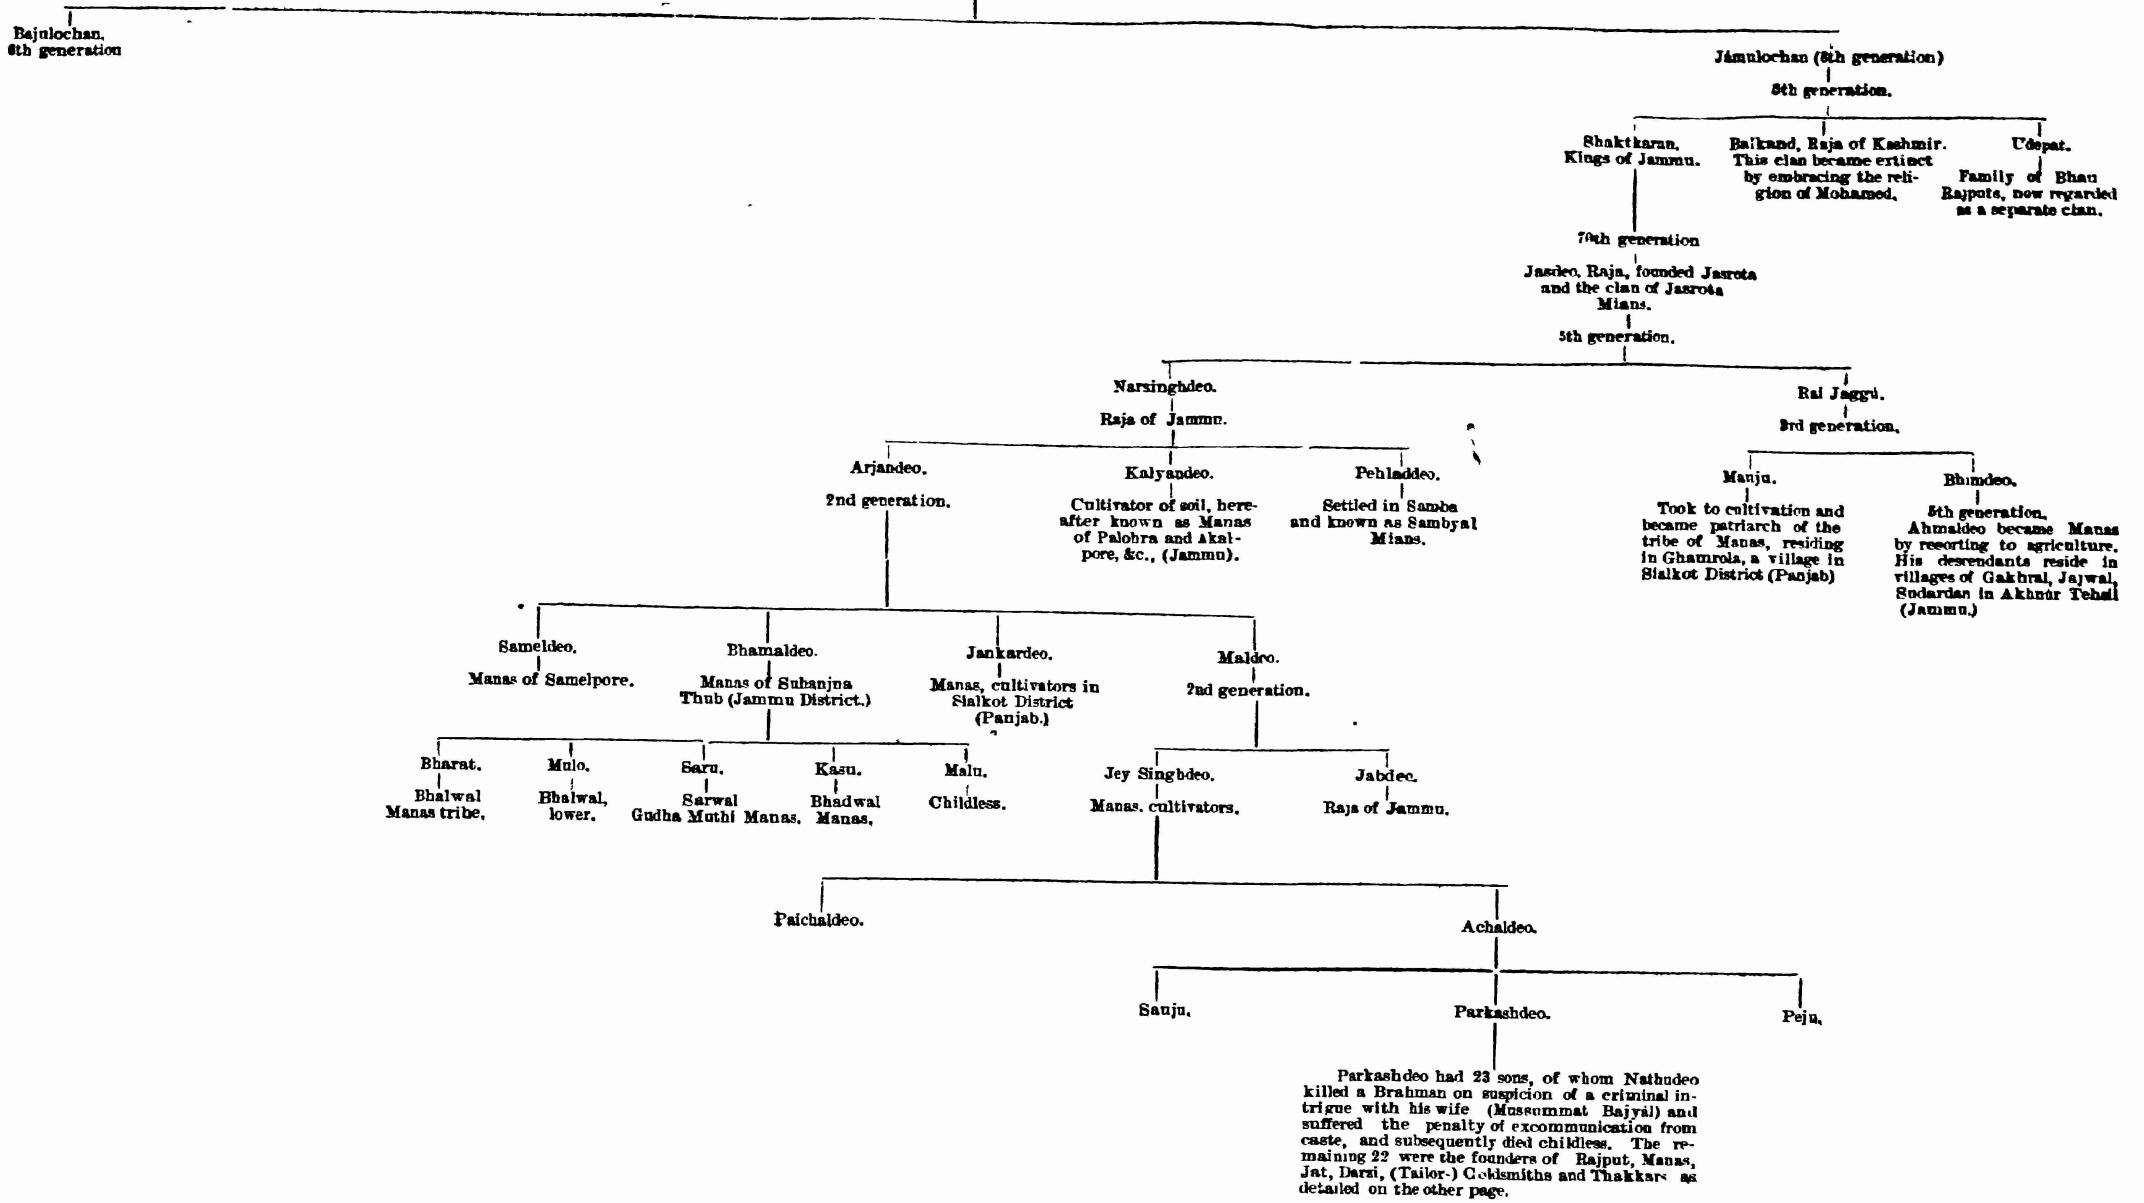
198. The principal and most important section of the Rajput community is that of Jamwal Rajputs, the clan to which the ruling family of the Jammu and Kashmír State belongs. The founder of the tribe was Jámulochan, the sixth in descent from Agnigir, one of the reigning Rajput princes of Oudh, who is said to have acquired vast tracts of territory in the Jammu Province by conquest. The following genealogical table shows the subsequent development of caste in this tribe ;—

AGNIGIR.



Bajnlochan, 6th generation
Jámulochan (6th generation)
5th generation.
Shaktkaran, Kings of Jammu.
Balkand, Raja of Kashmir. This clan became extinct by embracing the religion of Mohamed.
Udepat.
Family of Bhau Rajputs, now regarded as a separate clan.
70th generation
Jasdeo, Raja, founded Jasrota and the clan of Jasrota Mians.
5th generation.
Narsinghdeo.
Raja of Jammu.
Rai Jaggú.
3rd generation.
Arjandeo.
2nd generation.
Kalyandeo.
Cultivator of soil, hereafter known as Manas of Palobra and Akalpore, &c., (Jammu).
Pehladdeo.
Settled in Samba and known as Sambyal Mians.
Manju.
Took to cultivation and became patriarch of the tribe of Manas, residing in Ghamrola, a village in Sialkot District (Panjab)
Bhimdeo.
5th generation. Ahmaldeo became Manas by resorting to agriculture. His descendants reside in villages of Gakhral, Jajwal, Sudardan in Akhnúr Tehsil (Jammu.)
Sameldeo.
Manas of Samelpore.
Bhamaldeo.
Manas of Subanjna Thub (Jammu District.)
Jankardeo.

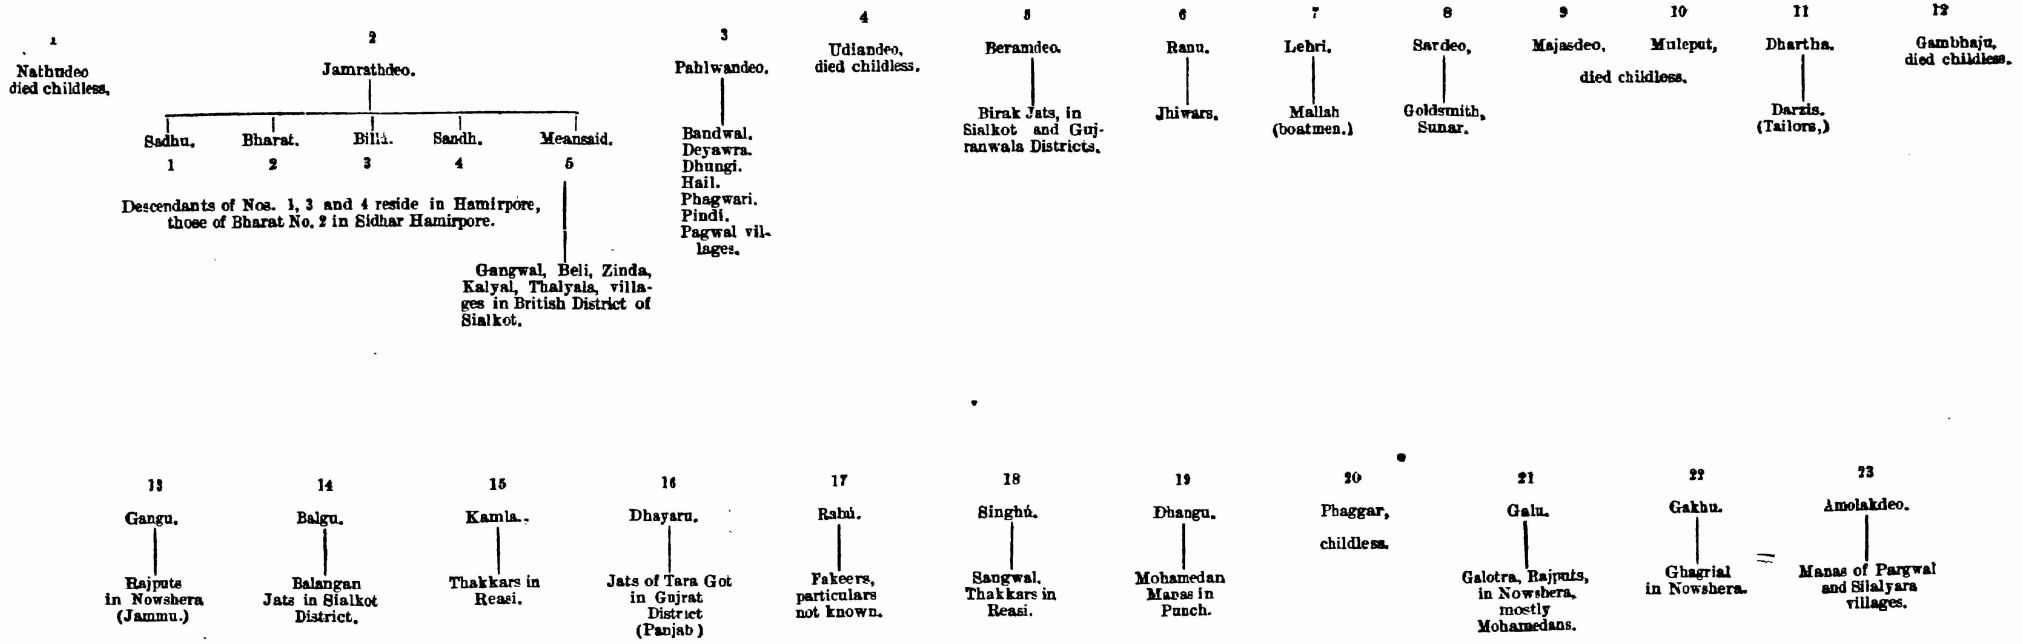
Parkashdeo.
Peju.
Parkashdeo had 23 sons, of whom Nathudeo killed a Brahman on suspicion of a criminal intrigue with his wife (Mussammat Bajyál) and suffered the penalty of excommunication from caste, and subsequently died childless. The remaining 22 were the founders of Rajput, Manas, Jat, Darzi, (Tailor-) Goldsmiths and Thakkars as detailed on the other page.



The above affords data for the conclusion that the inferior castes of Hindus have generally emanated from the superior castes, owing their separation from the parent-stock to unauthorized marriages and recourse to prohibited occupations. An ethnological enquiry into the castes, which at the present day prevails in the Hindu community, is most desirable, and in a state like Kashmír abounding as it does with the greatest variety, it will, if vigorously pushed at the future census, prove highly interesting and useful.

199. Jamwals.—The Jamwals are divided into three main sub-divisions, *viz.*, Jasroteas, Mankoteas and Jamwals, which are again sub-divided into the following clans :—

Jandi Panj Gerain Thalwal	...	Descents of Kansardeo, second son of Dhrivdeo.
Serohin	...	Do. of Balwantdeo.
Raipurye Panjorye Kanachakye	.. ..	Do. of Maharaja Gajey Singh.
Khal-ki-Mandi Sohl Khas Mandi Chani	. ...	Do. of Amar Singh.
Agorye Hamsali Jagti	... .	Do. of Mahárája Hari Deo.
Ramgarhye Kapur Dyaliye	... ...	Do. of Kapur Deo.
Narainye	...	Do. of Narain Deo.
Salhatye Shorkhanye	... ..	Do. of Mian Hásil Deo.
Dalpatye	...	Do. of Sangram Deo.
Manhálye	...	Do. of Dingi Man.
Bal Bhadryi	...	Do. of Balbhadra Deo.

200. Chibbs.—Chibbs number 4,865 Hindus, and 6,891 Mohamedans. They represent a clan of Katoch Rajpúts, so called after the name of its founder Chib Chand, who settled in Bhimbar, marrying the daughter of the Rajpút Chieftain Bhopal Singh.

In the seventh generation Raja Dharm Chand *alias* Shadi Khan embraced Mohamedanism, and his descendants are also called *Chibb* Rajpúts. The territory known as Chibbal (Gujrat District and its surroundings) is generally occupied by Hindu and Mohamedan Chibbs.

201. Charaks.—The Charaks numbering 2,163 are so called from their progenitor being a professional *Chábuk Sawar* (horse-breaker).

They claim descent from Surajbansi Rajpúts, and are good cultivators.

They occupy the villages of Mahin, Lollarh, Makhanpore, Laswara, Jagatpore, Pachal and Ala in Jammu Province.

202. Katals.—Katals are an offshoot of Khokhar Rajpúts. Kelan, the founder of the clan, extended his predatory excursions to Samba, a parganah of Jammu, and was a source of extreme annoyance to the local Rajpúts who got rid of him by causing him to be murdered by his own wife, a Thakkar girl ; his son Sahi, settled in the village of Katal whence the clan derives its name. They occupy eleven villages in Jammu, as detailed in the margin. The Katals are mostly cultivators.

Ragbal.
Bhathiari.
Mator.
Gungit.
Ghaink
Salari.
Chak Puroja.
Mawa.
Nandwal.
Philora.
Sahal.

203. Chaudhris of Kathua and Padol.—These clans belong to the Anadotra *alias* Allotra section of the lunar race. They are professional cultivators. They occupy 18 villages in the Jammu Province :—

Sa'dpore.
Khakharyal.
Mator.
Godand.
Mirpore Ram.
Mirpore Jaggu.
Bagwan Kala.
Khokhanyal.
Kirpalpore.
Taraf Sanjhi.
Taraf, upper and lower.
Pathu, upper.
Pathu, lower.
Padhri, upper and lower.
Lankot.
Phaknot.

204. Rakwal.—The founder of the clan was Malkhu, a Surajbansi Rajpút of Oudh, whose son held high offices in the Jammu State, and eventually took to agriculture. They occupy 5 villages, *viz.* :—

Chak Rakwal. Taror. Chak Malhore. Thathar. Bhatror.

205. Jaj.—Surajbansi Rajpúts claiming descent from Kushu, son of Ramchandra.

The founder of the clan was Trilochan who obtained the Chireahi *ilaqa* (Udhampore District) in *jagir*. The grant was resumed by Mahárája Gulab Singh, but the Jajs still own proprietary rights in the villages which number five in all. The clan derives its name from Jajot, a village in Reási, that being the original residence of Trilochan. The Jaj Thakkars are an offshoot of this clan.

Pata.
Dhanu.
Kotli.
Motal.
Samol.

206. Langeh.—The Jammu Langehs are mostly Hindus, and are said to have migrated from Ghazni, to escape conversion to Mohamedanism.

The Langeh community is divided into 7 clans, named after the seven villages noted in the margin, which were granted, about 800 years ago, to the original Rajpút immigrants from Ghazni. The clan now occupies nine more villages (see margin), all in the Jammu Tehsil, and have agriculture for their principal occupation.

Ghurota.
Amb.
Ghaink.
Aranjan.
Jandyal.
Malpore.
Lalyal.

Their fraternity in Kabul, who are all Mohamedans, still retain the distinctive appellation of Langeh Pathans.

Samachak.
Halka.
Jaswan.
Paryal
Kolasaohak.
Suhi.
Gudha.
Dammi.
Gaitha.

The Langehs occupy a subordinate position among semi-Rajpút clans, giving their daughters in marriage to Mians, Manas, and sometimes to Chibbs, and taking wives from the inferior clan of Thakkars.

207. Thakkars.—Thakkars number 109,912 Hindus, and 13,908 Mohamedans.

No Hindu caste is, in its details, more complicated than that of the Thakkars of Jammu.

Judging by the test of the sacred thread Thakkars undoubtedly rank with castes of good social position, but residence in the Himalayas, and the consequent exclusion of intercourse with the plains, have largely contributed to their degradation in a social and religious point of view. The majority of Thakkars are of Rajpút blood, but not uncommonly the clan has unscrupulously received among it, Brahmans and people of unknown parentage or doubtful origin, and it is difficult to say without an exhaustive inquiry, whether Thakkars are still Rajpúts, or comprise an independent agricultural caste inferior to Rajpúts, and superior to Jats and Gujars. The latter theory is probably the correct one, as Rajpúts of the lower orders do marry Thakkar girls, while the Thakkars themselves are not allowed the privilege of marrying in the lowest of Rajpút families.

208. The following is an ethnological account of some of the principal sub-divisions of Thakkars :—

1. *Dangereyi.*—Descended from the Senpal clan of Surajbansi Rajpúts.
2. *Bijeyi.*—Descended from Katoch Rajpúts, the founder of the clan receiving the epithet of Bijju in proving himself an exemplary cultivator of the soil.
3. *Gunge.*—Rajpúts of the Taj clan, so called after the name of their progenitor Ganga.
4. *Salhotre.*—Kharar Khatris of Salor.
5. *Jagyotre.*—Bhau Rajpúts.
6. *Jarrihal.*—Descended from a man of unknown parentage, and called after the name of the village in which he was born.
7. *Kúl.*—So called from Kulúr, the village of residence.
9. *Ladh.*—Manas Rajpúts, the word "Ladh" signifying "found" from the fact of the settler having selected land in the bed of a *nulla* (torrent) in Chanaini *jagir*, for cultivation.
12. *Chulanyal.*—So called from *Chula* (hearth) made in an outlying locality, by a lonely pregnant woman who settled in a village in Jammu, and gave birth to the founder of the clan.
13. *Gulyotre.*—Amba Ram Rajpúts.
14. *Agre.*—Sumbri Rajpúts.
15. *Kalas.*—Bhatyal Rajpúts.

16. *Bhaggu.*—Lakhan Brahman, became Thakkar by marrying a Thakkar girl.

17. *Nar.*—Katoch Rajpúts, the founder being a careless and ignorant cultivator, was surnamed *Anari* (unskilled) hence the clan name *Nar.*

209. In the hilly tracts of Bhaddu, the Thakkars have assimilated themselves with the zemindari clans of Satarmal, Rajwal, Nagwar and Jameri, and inter-marriage between them is freely allowed.

210. The various degrees of Rajpúts as regards inter-marriages and social position, are given below :—

I. Full Rajpúts representing ruling Rajpút families :—

Solar.	*Lunar.*
Jamwal. } Mians.	Cis-Ravi.
Jasrotye.	Bandral.
Mankotye.	Bhadwal. } One family.
	Bilorye.
	Hantal.
	Bhotyal.
	Bhadrawah.
	Kishtwár.
	Trans-Ravi.
	Katoch. } One family, kings of Kangra.
	Guler.
	Siba.
	Jaswal.
	Dadwal.
	Suket. } One family.
	Mandi.
	Kúlú.
	Kulurye (Bilaspore).
	Guler.
	Sarmore.

All these stand on an equal footing as regards inter-marriages between the Solar and Lunar races. The Lunar races also inter-marry among themselves, members of the same family excepted.

II. Half Rajpúts of the second degree, who give their daughters in marriage to full Rajpúts but who take wives from Rajpúts of the third degree—

Solar.	*Lunar.*
Manas Clans.	Amba Rai.
	Chibb.
	Jaral.
	Bhaú.

Note.—These also inter-marry among themselves.

III. Half Rajpúts who give daughters in marriage to Rajpúts of the first and second degrees, but who take wives from the 4th degree.

Lunar Race.

Rakwal. (These generally give daughters in marriage to Mians and Manas).

Salarye.

Charak. } One family.
Bágal.

Langeh.

Bijial.

Chaudhris of Kathúa. } One family of Bhadwals.
Chaudhris of Padol.

Jaj.

These do not inter-marry among themselves.

IV. Half Rajpúts who give daughters in marriage to Rajpúts of the third degree, but who take wives from Thakkars, besides inter-marrying among themselves—

Mándle.	Bhalwal.
Rasial.	Hans.
Kharar Khatri.	Bajju.
Samsal.	Balwal.
Jaggi.	Gaure.
Lalotri.	Seroch.
Katal.	

NOTE.—These clans are now regarded as Thakkars of a superior order.

Mándle, Bhalwal, Bajju, Hans and Seroch generally give their daughters in marriage to Rakwals and the Chaudhris of Kathúa and Padol.

V. Those who give daughters in marriage to Rajpúts of the fourth degree and also inter-marry among themselves—

Thakkars.

NOTE.—With the exception of Turands all wear the sacred thread.

The *Chádar dálná* system of re-marriage of widows prevails among Thakkars.

The Khas clans of Thakkars, or in other words, Thakkars of the snowy range inter-marry among themselves, they are considered inferior to other Thakkars.

211. To return to an examination of the return of castes we have—

	Kagar	1
	Godurz	1
	Hotaberi	1
	Total III	29
	TOTAL CLASS A ...	956,334

Of the Rajpút sub-divisions, Ahlia is Nepali Rajpút of low degree; Pare and Lon, Kashmír caste of Mohamedan Rajpút converts, and Shâhi and Thappa, Nepalese Rajpút caste.

Ját, Soni, Arain, Arain, Awan, are well-known agricultural castes, and do not require any special comment.

Choupans, sub-division of Gujar, are peculiar to Kashmír. The majority of Gujars are Mohamedans and constitute one of the principal nomadic tribes of the hills. They are immigrants from Punch and certain parts of the Panjab, and, in spite of their long and continued residence in the remotest and inaccessible parts of the State, still retain their primitive costume, language, and tribal sections.

XII.—Dancers and Singers—		
Kanjar	525	
Perna	250	775
TOTAL CLASS B	667,818	

Of the Brahman sub-divisions, Pandit, Safi, Bat, Aitu, Tantre, Dar, Rathar, Rishi; Raina, Khande, Ganai are Brahman converts to Mohamedanism; Bhatre are palmisters, and Bedangi and Pati, Brahmans of Nepal.

The sword of Islam was so prominent in Kashmír during the reign of Sikandar, the notorious idol-destroyer (*But Shikan*) that the majority of the population embraced that religion.

Mir is an agricultural caste of Sayads.

Devotees number 8,046 Hindus, 1 Sikh, and 16,145 Mohamedans. There are, of course, no Sanyasi, Beragi and Bramhchari Mohamedans. The Jogis and other Hindu ascetics who return males and females, comprise regular tribal section of communities in full enjoyment of secular and social rights and privileges, with the nominal distinctive appellation of sects merely because their progenitors happened at one time to be religious mendicants who subsequently renouncing the condition of celibacy and reclusion imposed on them by custom, resumed their worldly pursuits.

Of the Mohamedan Fakirs, Chishti, Kadri, Madari, Kalandar, Noshahi and Rawal, are found throughout Rajputana and Upper India. Said-Makars, Miskin and Tamburi, are local Kashmírí appellations, the first named being a set of mock Fakirs who are professional cheats and swindlers.

Beda, Malakhan and Mon sub-divisions of Mirasi are peculiar to Ladákh.

(*C.*)—Commercial.

xiv.—*Traders*—					
Arora ...	...	...	...	...	3,731

Artisans and Village Menials in the State of Kashmír are generally those found in other parts of India, with the exception of Sochi and Bangi castes of Ladákh, Kuch-band and Kamangar of Jammu, and Hanji and Vatal of Kashmír.

It is noteworthy that there are no Jhiwars (water-bearers) in Ladákh, Skardu and Gilgit, while those in Kashmír belong to the Rural District of Muzafferábád, the office of water-bearer in Srinagar city being performed by Mohamedans.

The absence of Artisans and Village Menials in Ladákh is accounted for by each household being its own barber, carpenter, &c., as will be proved by the following, the existence of which is mainly due to immigration from Kashmír for the benefit of the foreign population in Leh.

Goldsmiths ...	Sunar	...	1
Barbers ...	Nai ..	...	11
Tailors ...	Darzi ...	...	9
Drug-preparers ...	Bangi	...	1
Oil-pressers ...	Teli	..	16

CHAPTER VII.

Occupation.

212. The most laborious part of the work of compiling the Census Returns has been the preparation of the Returns of Occupation.

213. Separate statements have been prepared, showing for each district and the principal towns the occupations of the male and female population, distinguishing actual workers from dependents, while an attempt has been made to obtain more detailed information regarding Europeans and Eurasians by classifying the population by age.

214. Being a country where natural resources have not yet been at all developed, where difficulties of communication have impeded trade with British India, where the hills are inhabited either by agriculturists or by nomadic tribes, the Kashmír State cannot boast of any considerable variety in the occupations of its people. We find in Srinagar, however, traces of occupations owing their existence to an advanced stage of society, but in the rural population, there is none besides the agriculturist, the herdsmen, and the usual complement of village menials.

215. The total population of the State is 2,543,952.

Males ... 1,353,229
Females ... 1,190,723
} of whom the ages of 10,185 males and 6,721 females are unspecified.

Of the remainder, according to the statistics of age 538,687 males and 480,705 females are under15 years, and 84,526 males and 64,779 females 60 and above, making a total of 623,213 males and 545,484 females, who, being physically incapable of doing any work, might be said to be dependent on their relatives. We have, therefore, 623,213* males and 545,484* females, whose means of livelihood should be accounted for.

216. The subjoined table shows the results obtained from the Returns of Occupation :—

	Total strength.	Males.	Females.	According to Occupation Statistics.					
				Workers.		*Dependents.*		*Total.*	
				Males.	Females.	Males.	Females.	Males.	Females.
Whole State	2,543,952	1,353,229	1,190,723	676,545	73,442	676,684	1,117,281	1,353,229	1,190,723
Jammu	1,439,543	770,241	669,302	431,068	38,280	339,173	631,022	770,241	669,302
Kashmír	949,041	502,345	446,696	208,961	26,981	293,384	419,715	502,345	446,696
Ladákh	28,274	14,350	13,924	5,855	900	8,495	13,024	14,350	13,924
Skardu	110,325	56,098	54,227	20,466	711	35,632	53,516	56,098	54,227
Gilgit	16,769	10,195	6,574	10,195	6,570	...	4	10,195	6,574

217. It appears that all adult males generally follow some occupation or other, workers in males representing 49 per cent. and dependents 51 per cent. The percentage for each district is as follows :—

	Workers.		*Dependents.*	
	Males.	Females.	Males.	Females.
Jammu	56	5	44	95
Kashmír	41	6	59	94
Ladákh	40	6	60	94
Skardu	36	1	64	99
Gilgit	100	100		

218. The figures for the Urban and Rural population are :—

	Workers.		Dependents.	
	Males.	*Females.*	*Males.*	*Females.*
Urban population, Whole State ...	66,009	5,197	43,543	82,994
Rural ditto ...	610,536	68,245	633,141	1,034,287

* Omitting "Unspecified."

219. It is impossible to obtain correct statistics in this country regarding commercial occupations. The figures given for grain-dealers, general merchants and shop-keepers may be simply said to be misleading. Every shop-keeper is a general merchant, a grain-dealer and banker in his own way, and unless the enumerator is thoroughly intelligent and discriminating, he would certainly be guilty of some error or other, if he merely puts down the evasive reply given to his query. This explains the reason why 3,336 grain-dealers have been returned in Kashmír, against only 17 in Jammu, why there are only 281 general merchants in Kashmír against 4,591 in Jammu, and why other shop-keepers in Kashmír number only 1,419 against 11,578 in Jammu. Again, there are no blanket-weavers in Jammu, and no cotton-weavers in Kashmír, while, in fact, all weavers in both places work in both cotton and wool, and the enumerators apparently used their discretion in classifying one in contra-distinction of the other.

220. The province of Jammu cannot boast of any industrial occupations beyond the ordinary occupations of village menials. The towns in this Province of which that of Jammu is the seat of government, carry on an extensive trade in ghi, oil, grains and other necessaries with the hilly tracts in the interior, while Jammu answers besides, the requirements of the royal family and the civil and military establishments at the seat of government.

221. The province of Kashmír, or rather urban population of Kashmír, is more advanced in industrial occupations, the principal of which are :—

Shawl-weaving, &c.
Blanket-weaving.
Woollen Yarn spinning and carding.
Gold and Silver work.
Carpenter.

222. The Kashmír shawls and blankets are largely exported to British India, while carpenter's work and metal work find favor with the European visitors to the valley.

223. The principal occupations in the rural districts of Jammu and Kashmír are agricultural and tending of cattle and sheep.

224. The population of Ladákh which is effectively checked by polyandry is from natural causes, precluded from cultivating the more profitable industrial occupations, being content either with cultivation of the soil the proceeds of which are sufficient for their immediate requirements, or enjoying seclusion from worldly affairs by being ordained as Lamas. This explains the reason why the numerous occupations returned in Jammu and Kashmír are absent in Ladákh. Circumstanced by nature the Ladákhi is trained in all the avocations necessary for his existence and personal comfort. He is himself his own menial, barber, tailor, butcher and anything else. The same remarks apply to Skardu.

225. The following Comparative Statement, which has been prepared from the Occupation Tables, shows the number of workers in each district, with separate details for the urban and rural population. Advantage has also been taken to give approximately the average number of dependents on each worker :—

Number.	Occupations.	Workers.									Average number of Dependents on every Worker.

Note.—W. Workers outnumber Dependents. D. No Dependents. X No Workers.

226. This information is interesting in the first place, as giving an idea of the general condition of the people, their principal means of livelihood, the extent to which they have succeeded in combining natural resources with industry and the tendency for improvement in the future.

227. Barring the Kashmír valley and that portion of the Jammu District, which immediately adjoins British territory, the rest of the country is intersected by lofty mountain ranges, is practically cut off from communication with the more favored parts of British India and constitutes the tranquil home of the agriculturist, the priest and the herdsman.

228. The average number of dependents on every worker is 3 for agriculturists, and nearly 2 for others, which is by no means excessive; in the urban population it is 2, in the rural population nearly 3.

229. There is no ground for the theory advanced by certain critics that the majority of the people are starving. It might be said with certainty about the natives of the State that they are fairly solvent and well to do.

230. The agriculturists here comprising 69 per cent. of the total population are remarkably free from debt. The mode of living is very simple, provisions in the interior are cheap and the people live in peace and harmony. The Kashmíri is extremely careless about his livelihood, he has been of late dependent on the State godowns for his food supply, always managing to get it at a trifling cost, but the increasing demand on the State exchequer has necessitated the making of revenue collections in cash and the agricultural classes will, it is hoped, under an improved system of administration of the land, make more profit out of their property than they have hitherto done.

231. Out of a total population of 2,543,952, 1,762,843, or 69 per cent. are agriculturists, below :—

	Jammu.	Kashmír.	Ladákh.	Skardu.	Gilgit.	Total.
Live Stock	10,011	18,214	1,459	273	...	29,957
Land occupants, not cultivating ...	35,682	...	23,180	103,522	1	162,385
Ditto, cultivating ...	462,216	419,230	37	22	...	881,505
Lessees of villages	3,333	2,743	5	52	...	6,133
Tenants and sharers cultivating ..	538,001	141,365	...	1,874	...	681,240
Growers of special products and trees	1,207	411	2	...	...	1,620
Directors of agriculture and their assistants.	...	3	...	...	...	3
Total ...	1,050,450	581,966	24,683	105,743	1	1,762,843

232. In the absence of a well-defined system of tenures, it is unsafe to accept the sub-divisions of the land owning communities as reliable. The enumerators of Ladákh and Skardu appear to have put down all land occupants as "not cultivating;" the mistake, however, is an excusable one, there could be no doubt that however faulty the internal details may be, agriculturists, as a class, have not escaped enumeration and record, and, considering that the present is the first census ever held in the State, and that the districts of Ladákh and Skardu were beyond the pale of provincial superintendence, it is gratifying that the general out-turn and quality of the work was fairly satisfactory.

233. The following is a record of occupations other than agriculture and State service followed by 1,000 workers and above, in Jammu and Kashmír :—

Occupations.	Total Whole State.	Jammu.	Kashmir.	Ladákh.	Skardu.	Gilgit.	Urban population.	Rural population.

234. The natives of India are, as a rule, extremely conservative in occupations, each tribe or section following the occupation handed to them by their ancestors, occupation being an important factor in the determination of social position among both Hindus and Mohamedans.

235. There are certain occupations which belong exclusively to certain tribes and would not under any circumstance be followed by others, and there are occupations peculiar to Hindus and peculiar to Mohamedans, to the exclusion of one another.

236. The impure castes, *viz.*, Churas, Sepi, Batwal and others, named in the return of Caste as " field laborers," are either scavengers, vagrants, or field-laborers and do not and cannot follow other occupations, because they are void of any social position and are considered unclean by the other castes of Hindus. Their occupations are, therefore, restricted to things which are considered unclean by the other Hindus.

237. The inferior castes comprise those tribal sections of the Hindu community as are admitted to the general platform of Hindus, or in other words, those whose water could be legally drunk by the higher classes. These are mostly castes by traditional occupation, and though their specific occupations could not be assumed by the superior castes without detriment to social position, yet they are at liberty to follow any other occupation of a higher order, without the risk of expulsion from caste.

238. Brahmans and other castes of good social position, generally engage themselves in a variety of occupations without loss of caste, but Rajputs incur degradation by one step, by taking to cultivation of the soil.

239. The Kashmírí Brahman is very strict about his occupation. A *karkun* would never dream of becoming a *Bachabatt*, nor would a *Bachabatt* aspire to a karkunship. The favorite occupation of the Kasmírí Pandits are trade and commerce, State service and the minor occupation of cooks, tailors, bakers, confectioners. They consider it beneath their dignity to work with the plough, or to follow any other occupation.

240. The favorite occupation of Kashmír Mohamedans is agriculture, but they are without any attempt at exaggeration credited with monopolizing all the occupations (excluding State service) of Kashmír.

241. An attempt is made in the subjoined table to compare the caste return with the corresponding entries in the Occupation Tables, to show what occupations are restricted to particular classes of the people and which are open to all, excluding of course the impure castes who are obviously restricted to their special avocation.

CHAPTER VIII.

Administration of the Census Operations.

243. On 19th March 1890, the orders about taking a Census of the Jammu and Kashmír State, contained in Census Commissioner's No. 19, dated March, 1890, were communicated to the State Council by the Resident in Kashmír, for report as to what the Council proposed doing in regard to preliminary arrangements, registration of houses, instruction of enumerators and supervisors, the provision of Census Schedules and the character in which they should be printed or lithographed, and finally, the arrangements for abstraction and compilation, as also the general question of the superintendence of the operations.

Resident's endorsement No. 346, dated 19th March, 1890, to the Secretary State Council.

244. By Resolution No.1, dated 25th April, 1890, Rao Bahadur Pandit Bhag Ram, Judicial Member, was appointed Superintendent of Census for the whole State.

245. On taking charge of my duties, I at once addressed the Resident, requesting to be favored with the form of the house-lists, &c.

246. Meanwhile, certain circulars issued by the Census Commissioner were received, which enabled me to submit my proposals for future action.

247. The Circulars issued by me, which were generally approved by the Resident and the Census Commissioner, will be found in the Appendices to this Report.

248. The Rajputana and Central India Schedule of eight columns was adopted.

249. My experience of the dilatoriness which characterised the despatch of business by district Officers and Tehsildars in all administrative matters, prompted the necessity for very stringent and energetic action. It was hardly sufficient to issue instructions and wait for reports of compliance without one's satisfying himself by personal observation or otherwise, whether the work said to have been done was a reality. My first care, therefore, was to appeal to the President of the Council who issued a proclamation under his hand, inviting the co-operation of all officers in Census work. This had some effect on the local officers, but the introduction of a system of close supervision nevertheless appeared necessary, particularly in Jammu, where the District Officers displayed utter indifference, submitted false reports of progress, and did not care to move about within their respective jurisdiction, to see how the work was getting on.

250. For purposes of the Census, the whole State, excluding the frontier districts of Ladákh, Skardu and Gilgit, was divided into two Provinces, *viz.*, Jammu and Kashmír, each presided over by a Provincial Superintendent. The Provincial Governors being unable to accept this office, it was entrusted to the Chief Judges.

251. Each Wazir-Wazarat was made responsible for the work of his district, while Tehsildars were appointed Superintendents of charges in their respective Tehsils. Progress Reports were called for, but for sometime none were received. The Chief Judges were then ordered to make periodical tours which had the effect of bringing the local officers to a sense of their duty and since August 1890, thanks to the great interest taken by the President of the Council, Raja Sir Amar Singh, the work proceeded with exemplary regularity and promptitude. The enumerators were generally non-officials and with some exceptions, did their work willingly and cheerfully.

252. The Census Superintendent personally examined the house-lists of the Srinagar and Anantnag districts in Kashmír and the Udhampore and Reasi districts in Jammu and was satisfied with the result.

253. In Jammu special officers had to be deputed to see to Census work, as the Reports of Progress were considered totally unreliable. These officers constantly moved about in the districts to which they were attached, while each district was also visited by the Provincial Superin-

tendent just about the time, when the house-lists had been prepared and the preliminary record was taken in hand.

254. In Srinagar, the local Municipality and their President, Dr. A. Mitra, did the work admirably.

255. No previous census having been taken, the task of preliminary operations connected with the registration of houses, determination of blocks, supervisors' circles and charges of superintendents, was a most difficult one. The officials in the mofassil hardly took an interest in this work, and though the preliminary lists of villages and houses were very simple, yet the orders issued at first regarding their preparation were entirely ignored, and recourse was had to the issue of a proclamation under the signature of the President of the Council, warning all concerned of the penalties to be incurred by wilful procrastination and indifference to Census work. This produced very little effect, and as the samples received from out-stations, were replete with errors too numerous to mention, a general order was again issued, inviting active co-operation of the staff, a series of simple rules drafted by the Census Superintendent were translated in the prevailing languages, and the work was entrusted to high paid Moharrirs specially trained at head-quarters. I particularly insisted on the preliminary operations being conducted with energy and exactitude, because from personal experience of the staff, I was fully conscious that the slightest divergence from established procedure would lead to endless confusion, and, therefore, with the greatest possible anxiety, I used all the means available for careful scrutiny of the work in progress.

256. In the absence of an organized settlement of land revenue, the distinction of parent villages from Dakhili hamlets was attended with difficulties, and the surest course was to rely on the judgment of Wazir-Wazarats, but as regards preparation of house-lists, determination of blocks, circles and charges, I may assert with confidence that our work was as successful as in any other part of British India.

257. The definition of house was very clearly explained and readily understood, there being very few big enclosures containing a number of separate dwelling-houses in the Rural Districts, while in the more important towns of Jammu and Srinagar, the presence of the Superintendent ensured the correct preparation of the house-lists. Rough maps, giving the relative position of each house on main site, were duly prepared and particular care was taken to check them. Then followed the determination of blocks, supervisors' circles, &c., which was done by local district officers under the immediate guidance of the Provincial Superintendents, strictly in conformity to the rules issued by me.

258. A sketch map of each charge was prepared and sub-divided into circles, every supervisor was also furnished with a block map to guide him into every corner of his circle.

259. The whole area having been divided into blocks and duly mapped out, the house numbering was begun, but again the Wazir-Wazarats and local officials in the interior displayed an unpardonable want of energy. A circular order was accordingly issued (Circular No. 3, dated 7th August, 1890) warning them, and an example was also made of notorious delinquents by summary dismissal from office.

260. The Chief Judges of Jammu and Kashmír made an extensive tour within their respective jurisdictions and spared no pains to keep the establishments up to their work.

261. Before taking in hand the preparation of the preliminary record, training schools for instruction of enumerators were established in each Tehsil. Great care was taken in selecting the best men available to serve as enumerators. A *parwana* of appointment was given to every enumerator, the blocks were determined with special reference to the nature of the work required, every enumerator being furnished with an extract from the house-list, index register and block map and particularly required to acquaint himself with the position of the houses in his block.

262. Similarly every supervisor and superintendent was furnished with the records appertaining to their circles and charges respectively.

263. The subjoined table shows the agency employed in Census :—

Province.	Enumerators.						Supervisors.						Superintendents.						Special Superintendents.						Total persons.

*The Non-officials were :—

Lambardars of Villages 177
Shop-keepers 460

264. The final enumeration took place on the following dates :—

Jammu Province, 26th February 1891.
Kashmír Province, ditto ditto.
Pudar, Jaskar, Kishtwar, and Ramban in Udhampore district, 26th December 1890.
Reasi, 20th December 1890.
Ladákh, 30th October 1890.

265. In Gilgit, with the concurrence of the Census Commissioner, the house-lists were only prepared and no detailed census was taken.

266. The only tract, where unpaid enumerators could not be had, was the district of Muzaffer-abad in the province of Kashmír, where 20 enumerators were employed at a total cost of Rs. 265-5-0.

267. The characters used by the Enumerators were :—

	Urdu.	Persian.	Dogri.	Ladákhí.
Jammu	5,333	...	3,600	...
Kashmír	...	4,808	...	..
Ladákh	137		..	571
Skardu ...	686	...	...	...
Total ...	6,156	4,808	3,600	571

268. For the convenience of the tabulating staff, the Ladákhí books had to be translated into Urdu, at a cost of Rs. 70.

269. The following Statement shows the distribution of printed papers, circulars, schedules, &c.:—

No.	Place.	Instructions for preparation of— House List (Register B)	Instructions for preparation of— Register A.	Circular No. 3.	Circular No. 4.	Circular No. 5.	Circular No. 6. 270. The printing of the Urdu Schedules was done in the *Mufid-i-Am Press,* that of Hindi and Dogra books, and of Circulars, &c., at the State Press. In both places the work was done promptly and expeditiously.

271. With the exception of Punch, the Jagirdar of which place had his Schedules printed at his own cost, the other Jagirs received their supply from the Census Superintendent.

272. The preliminary record, generally speaking, was prepared with the greatest care and no pains were spared to exercise the necessary supervision.

273. Every Tehsildar visited all the villages in his Tehsil and checked the house-lists and Enumerator's Schedules appertaining thereto. Every Wazir-Wazarat examined the work of the Tehsildars under him and submitted periodical reports to the Provincial Superintendents who also visited every District and Tehsil and satisfied themselves by personal examination of the records that they had been correctly prepared while special experts were also deputed, particularly in Jammu territory, to see that every thing was done carefully.

274. On the 3rd February 1891, the Census Commissioner visited Jammu, and his opinion regarding the quality of the work done may be gathered from the subjoined extract from a memorandum furnished by him to the Resident in Kashmir:—

"The map of Jammu town and of the blocks into which it has been divided are very clear,"
"and apparently care has been taken not to omit any thing that will help the enumerator and"
"supervisor in their work. The books of the town, too, which I have seen, as well as those of the"
"Dehát of Rambir Singh, have been well written up, and generally in accordance with the instruc-"
"tions. Considering that this is the first attempt to obtain such a record, and that the books shown"
"me had not been fully scrutinised by the Superintendents, the results are decidedly creditable, and"
"if the outlying portions of this large State are as carefully done, the Census should be one of"
"considerable value. The few defects I found were pointed out at the time of inspection, and were"
"none of sufficient importance to require special notice here."

275. Special arrangements were made for counting the boat population in Kashmír by the appointment of Special Enumerators and Supervisors. The boat population amounted to 2,967 males, and 2,547 females. The railway population amounted to 144 males and 40 females, and was confined exclusively to residents within railway limits, as no trains arrived at Jammu on the night of the Census.

276. The enumerating staff was generally well-behaved and attentive to their work; of the seven cases of petty illegal exaction reported by the Police, conviction was had in all with the following result:—

1. Sher Singh, Enumerator, fined Rs. 25, or in default two months' imprisonment.
2. Nikka Doom, Chowkidar, sentenced to two weeks' imprisonment, and Rs. 3 fine.
3. Mohammed Bakhsh, Enumerator, fined Rs. 25.
4. Sohan Singh, Patwari, and Abbas Ali, fined Rs. 4 and 1 respectively.
5. Manohar, Enumerator, and Nabbir Mattu, fined Rs. 7 and 5 respectively.
6. Nabi Bakhsh, Enumerator, fined Rs. 15.
7. Samda, Enumerator, fined Rs. 5.

277. The revision of the Schedules on the night of the Census was conducted strictly according to the rules.

278. The procedure observed in regard to the disposal of the books after the final enumeration is laid down in Circular No. 8. There was some delay in the receipt of books from snowy tracts, but, on the whole, the work of tabulation had a fair start in the month of April 1891.

279. The Central Office was organized at Jammu under the immediate supervision and control of the Census Superintendent, while a branch of the same office was also established in Kashmír with a view to its eventual amalgamation with the Central Office, when the Census Superintendent proceeded to Srinagar during the hot season.

280. Before commencing the actual work of abstraction Moharrirs in Jammu and Srinagar were employed in checking and re-preparing the enumerators abstracts at a total cost of Rs. 406-12-0.

281. The Strength of the Central Office was:—

1. *Abstraction*—

62 Abstractors	...	...	2,625 10 9	for 5 months.
29 Re-abstractors	...	...	1,181 1 3	„ „
6 Room Inspectors	...	...	1,124 13 6	for 7 months.
Contingencies	...	...	779 7 6	
		Total...	5,711 1 0	

2. *Tabulation*—

Superintendent, *ex-officio*.				
Tabulating Moharrirs ...	...	...	1,853 12 6	for 6 months.
Contingencies ...	...	...	193 9 0	
		Total...	2,047 5 6	

3. *Compilation*—

Superintendent, *ex-officio*.				
Moharrirs ...	...	...	830 1 3	for 8 months.
Contingencies	...	...	456 0 0	
		Total ...	1,286 1 3	
		Grand Total ...	9,044 7 9	

282. The *modus operandi* was precisely the same as that laid down by the Census Commissioner. No abstractor was allowed to communicate with any member of another gang or make notes of his totals.

283. The re-abstraction was conducted independently, and care was taken to prevent the re-abstracting establishment having access to the original working sheets. In every case, the original and re-abstracted sheets were passed by the Room Inspector and the Superintendent who invariably satisfied himself of their accuracy by personal examination, one-fourth of the working sheets were re-abstracted, and of these 85 per cent. tallied with the original, and where discrepancies were found, they were chiefly in internal details, without affecting the totals.

284. The Tabulation and Compilation was entrusted to trained clerks, and was under the immediate control and supervision of the Census Superintendent who personally checked every entry posted from the working sheets and registers.

285. The total cost of the Census was as detailed below:—

Census Officers attached to Districts	...	3,967 9 9	
Office of Census Superintendent	...	...	1,415 5 0
Preparation of Enumerator's Abstracts	...	...	406 12 0
Central Office of Abstraction	...	...	4,931 9 6
Tabulation and Compilation	...	...	2,683 13 9
Contingencies including printing	...	...	11,404 6 6
Travelling Allowances	...	...	843 13 0
Total	...	25,653 5 6	

or about Rs. 10 per thousand on a total population of 2,543,952. Calculated on the expenditure incurred on enumeration, the cost was only annas 2-6.

286. The enumerators' books were generally well-written, but owing to the variety of languages in which they were written, the establishment employed in abstraction was rather heavier than in British Districts. The Enumerators did not specify birth-place within the State by particularizing the district of birth. In the standard questions to be asked by the enumeration, the question regarding birth-place was—"In what State or Province were you born?" and the reply recorded was "born within the State."

287. In the column of Caste, the main tribe was only given, there being no column in the Schedule for minor sub-divisions. I think in a future Census of the State the full British India Schedule should be introduced, as the State presents a wide field for ethnological research.

288. In column 8, Occupations besides agriculture, were rarely recorded, and the words owner or tenant, owing to the absence of well-defined land tenures, were generally misunderstood, with these exceptions, the entries in the Schedules, thanks to the pains taken by the Subordinate Supervising Staff, were as correct as could be desired.

289. The difficulties attending the successful completion of Census operations in a Native State can be imagined rather described, and in Kashmír, these difficulties were particularly aggravated by the notorious incapability, want of energy and apathy of the local officials; while last but not least, the vast extent of territory, the remoteness of the frontier districts of Ladákh, Skardu and Gilgit and certain parts of the Jammu Province from head-quarters, the interruption caused by snow, and the sheer want of trained men, were by no means impediments which could be easily overcome.

290. No previous Census having been taken, the officials entrusted with the work, regarded it as a thinkless task and apparently hardly took any interest in it, repeated orders and instructions were ignored with impunity, and though the instructions issued were simple and clear, yet in several places the work had to be done twice over. The regular staff of supervisors and superintendents was found to be careless, untruthful, and non-persevering and special officers had to be deputed to set matters right by personal and close supervision.

291. The work which thus devolved on the Census Superintendent and the Provincial Superintendents of Jammu and Kashmír was a very heavy one, special arrangements were made for submission of periodical reports and keeping the establishment to their work, the least drawback being effectively noticed and punished, and the greatest care taken to ensure the preparation of a correct record.

292. If any future Census of the State is taken, I may be permitted to state as the result of my personal experience, that the Census Superintendent and the Provincial Superintendents of Jammu and Kashmír be entirely relieved of other official duties, and placed solely in charge of Census work, that they be invested with full power of punishing their subordinates, and that, if possible, the highest revenue authority should have the final control of Census Operations. I do not mean to convey the impression that my control of Census Operations has, by reason of my being the head of the Judicial Department, met with any opposition from other Departments; on the contrary, I feel it my duty to publicly acknowledge the friendly support which was accorded to me by my colleagues and the Provincial Governors generally, but I cannot refrain from remarking that the Subordinate Staff not unfrequently displayed a spirit of indifference to my orders, and in answer to my stringent reminders generally pleaded press of their legitimate departmental work, and often gave cause for serious anxiety.

293. If therefore, after making due allowances for the numerous difficulties which blocked the way, the preliminary census operations could be pronounced to be on the whole successful, I would take the liberty to bring to the notice of the State Council the conspicuous services rendered by the chief Judges of Jammu and Kashmír, and the President of the Srinagar Municipality, to whose untiring zeal and energy in carrying out my orders, in frequently visiting their charges, in promptly detecting errors and shortcomings, and in according to me their most hearty co-operation in all matters too numerous to mention, was due the successful completion of this work, and I trust that these gentlemen will be substantially rewarded for their labors.

294. The District Officers generally worked well, and I think their services should receive due acknowledgment.

295. In Jammu the President (Provincial Governor) not being able to spare time for the exercise of close supervision, a special officer, namely, Bakhshi Parmanand, the Deputy Governor was deputed, and the work was done expeditiously and correctly. The Bakhsi desserves great credit for bringing up arrears.

CIRCULAR ORDER BY PRESIDENT OF COUNCIL.

Whereas the Government of India desires that a Census of the population of the Kashmír State should be taken, all Civil Officers, in the service of the State in the Revenue, Police, Judicial and other Departments, are hereby invited to co-operate with Rae Bahadur Pandit Bhag Ram, Judicial Member of the State Council, who has been nominated Superintendent of Census for the whole State, and by whom all instructions regarding the Census will be issued from time to time.

2. The undersigned desires to impress on all officers who may be employed on Census work, the desirability of performing the same with the utmost expedition and promptitude, and it is needless for him to state that any public officer who is found to be disloyal in carrying out instructions, or is proved to be negligent in the performance of Census duties entrusted to him, will be visited with severe punishment.

3. Officers in executive charge of duties must see that the objects of the Census are clearly understood by the people, and that all false rumours and reports which usually take place in connection with the work of enumeration must be duly checked. They must at the same time make it as widely known as possible that every person is legally bound to furnish such information as is necessary for the complete and accurate filling up of the Census Schedules, and see that unnecessary obstacles are not thrown in the way of the working staff.

4. Officials should, as a rule, be employed in the work of enumeration, but where they are not available, voluntary non-official agency should be obtained as far as possible, the men being assigned duties which do not take them away from their ordinary abode. Where special and paid agency is necessary, a special report should be submitted for the orders of the Superintendent.

5. Any person detected in extorting money on any pretext connected with the Census, shall be punished under the Penal Code of the State.

Circular No. 1, dated 19th July 1890.

From—Rai Bahadur Pandit Bhag Ram, Judicial Member of State Council.

To—The Wazir-Wazarat of———

You have received official intimation that a Census of the population of the Kashmir State will be taken under the orders of the Imperial Government. The date proposed for the Census is the night of the 26th February 1891, when the final enumeration will take place, but the registration of houses and the distribution of circles and blocks, must be taken in hand at once. The State Council has sanctioned the entertainment of a Moharrir who will be attached to your office on duty connected with the Census, but you must remember that he is to be employed solely on clerical duty which will by no means be light, and that the State Council look to you as the officer responsible for the efficient control and supervision of Census Operations in your District. Under the Circular Order issued by the Prime Minister and President of the State Council, all Civil Officers employed in your department will co-operate with you, and you are particularly requested to avail yourself of their services without jeopardizing their legitimate work.

2. Having carefully studied the circulars and instructions issuing from this office, you must explain them to your subordinates and satisfy yourself that they are thoroughly understood before action is taken on them. With this object you might hold a conference of the officers nominated by you on Census duty as often as you may consider it necessary. If you are in doubt on any point you must unreservedly refer it to me for orders.

3. With regard to the operations themselves, the first step is to secure the preparation of Register (B) showing the name of each village, with those of its outlying hamlets, or other detached quarters.

4. The form of the Register accompanies herewith. It should be prepared separately for each village borne on the revenue list, Dakhili Mauzas being of course shown in the register of the parent village.

5. The preparation of the list of houses must be entrusted to official agency. It might be advantageously entrusted to the village Patwari or Mukaddam, the Kanugo or the Naib Tehsildar being told off to supervise the work. In outlying tracts situated at a distance from the Tehsil, the task of supervision might be undertaken by the officer in charge of the Police Station.

6. You must very carefully study the note of instructions accompanying this circular, and before starting work, submit to this office a detailed report of the arrangements made by you and the probable date by which they will be completed.

7. I am to invite your particular attention to Rule 4, which requires that the houses should not be marked with numbers till the lists have been finally revised and corrected.

8. On this point I will have the honor to communicate with you at an early date.

9. I am disposed to think that if proper arrangements are made by you, the preparation of the house-list ought not to take more than a month.

CENSUS REGISTER B (HOUSE-LIST).

(To be printed on reverse of outer sheet of Register.)

INSTRUCTIONS.

1. In rural tracts the preparation of the list (B) should be taken in hand at once. The entries must be made in the order in which the sub-divisions can be visited in succession. The houses must be entered in columns 3, 4, 5 and 6, in corresponding order, and a separate series of house numbers must be kept for each village. For the purposes of the Census, "*House*" means a building inhabited either by day or by night, whether by a single individual or family, or by more than one person or family, but having a separate entrance on to a road, street, lane, or public place, or *open space used in common by the inhabitants of the building but which is not a mere court-yard forming a part of the house itself.* It is the duty of the supervising officer to see that this description of a house is duly explained and made intelligible to the *village officers*, and that the latter apply it correctly in drawing up their lists. No single house, shop, temple, *Sarai* and *Dharmsala*, must be omitted wherever it may be situated in the area of the village, and the supervisor should prepare a rough map giving the relative position of each house in main site, hamlets or landing places, &c., within the Mauza. After entering the house, space should be left for encampment of wanderers and cowherds, for travellers at wells or under trees, or for boats at the mooring places which may have to be visited at the Census.

Columns of Register B.
Column 1. Name of village.
" 2. Name of sub-division.
" 3. Serial number of house.
" 4. Description of house.
" 5. Name of principal occupant of house.
" 6. Number of habitual residents of house.
" 7. Remarks.

2. Ruined houses, houses that are not likely to be completely built and inhabited by February 1891, stables, cow-sheds, ware-houses, store-sheds, &c., not being inhabited, should not be entered in the list, though a space or two must be left at the end of each village list to admit of the entry of any such building found casually tenanted at the time of Census, as also for entry of places of encamping, mooring boats, and similar localities, in which any body may be found on the Census night, other than a watchman, &c., who lives elsewhere and is counted as present at his residence; dispensaries and other public institutions should have a single number, but if there are separate and independent buildings, as quarters for the officials in charge or servants attached to the institutions, every one of such buildings should be counted as a house, and be shown under a separate number. As a general rule, each building must be shown as a house, in which any person resides, that is, habitually dwells and cooks. In the case of buildings such as shops or schools, which are only used in the day time, a note to that effect must be made in column 7 of the list. The serial numbers entered in column 3 must not be considered as final until the village has been visited and the entries tested by the supervisor or charge superintendent.

3. Where there are Havalats and Hospitals, the whole building should receive a single number, and detached quarters for the officials, &c., must be numbered separately. Police lines should be treated under the general definition as well as large *Sarais* and *Dharmsalas* or other buildings for the convenience of travellers, and column 5 need show only the permanent residents of such buildings, whilst column 6 should be left blank. Harbours, too, will be treated when large enough to form a separate charge in a special register. In the case of special buildings to which this definition does not, in the opinion of the charge Superintendent, correctly apply, he should draw a rough plan of the building, and point out his difficulties with regard to it.

4. When List (B), has been finally revised, the *village officers* or other persons appointed for the purpose should have the number corresponding to that in the list, affixed to each house, so that enumerators who are not residents of the place, may have no difficulty in finding every building down on the list attached to their schedule book. These numbers should be painted in the cheapest material in common use in the locality for that purpose, either on the wall of the

building or on a board or plate fixed to the wall. These numbers will be checked with the list by the supervising and Superintending Officers of the charge as well as by the District Officer when he makes his tour of inspection of the arrangements for the Census.

TOWNS.

5. The instructions laid down for rural tracts apply *mutatis mutandis* to towns, the second column of the Register (B) showing the name of sub-division, ward, mohalla and suburbs, in the order in which they can be conveniently visited in succession. The serial numbers should be separate for each ward or for such a division of a quarter, as the District Officer, or in the case of a municipality the President, may prescribe. Both in villages and towns, a copy of the block list should form part of each schedule book.

Circular No. 2, dated 23rd July 1890.

From—Rai Bahadur Pandit Bhag Ram, Judicial Member of State Council.

To—All Wazir-Wazarats, Kashmír State.

In my Circular No. 1 of 19th July 1890, I had the honor to lay down detailed instructions for the preparation of the village Register and list of houses (Form B). These lists will be prepared and checked by official agency. As soon as the number of houses is known, you should proceed at once to divide your District for Census purposes into blocks, circles, and charges.

2. By '*Block*' is meant the beat of an enumerator, comprising such number of houses as can be conveniently visited by him in the course of a day. In a country like Kashmír, it is impossible to prescribe a standard block, you will therefore use your own discretion in determining the enumerator's blocks in your district.

3. By '*Circle*' is meant the blocks entrusted to a supervisor. This officer ought to be able to check and supervise the work performed by enumerators, and unless for special local reasons to the contrary, a supervisor can be conveniently placed in charge of ten blocks.

4. By '*Charge*' is meant the jurisdiction of a superintendent who will under your orders supervise and control the work performed by supervisors and enumerators.

5. The enumerator must be able to read and write. He must thoroughly understand the columns of the schedule and the way of filling them, and must visit every house in his block, making the entries after personal enquiry.

6. The supervisor must ordinarily be a State official thoroughly conversant with the rules and instructions. He should not only train the enumerators in his circle in Census work, but must see that the work is properly done.

7. The Superintendent of a charge is the controlling officer subordinante to the Wazir-Wazarat.

8. Detailed instructions for the guidance of these officers will be issued in due course, but in the meanwhile, it is essential that the most fit and competent persons should be selected for the duties required of them, and this could not be better done than by making enquiries, while the house-lists are under preparation, in order that on their completion, the division into blocks, circles, and charges may be made at once.

9. In making your sub-divisions for Census purposes, I would suggest that you will probably consider it advisable to confine yourself to the existing territorial divisions for administrative purposes. For instance, you might advantageously nominate the Tehsildar as Superintendent of a charge comprising the whole of his Tehsil, unless it comprises too large an area to be satisfactorily handled by one person, in which case, a Police officer not below the rank of an Inspector of Police or the Naib-Tehsildar, might be associated with him. The Police Thanadar could more usefully act as supervisor for the village within his Police Station, while the village Patwari, such Headmen as are literate, and the non-official agency available, should be appointed enumerators of blocks of which their local knowledge and experience will prevent the possibility of errors creeping in the statistics.

10. The above is only a suggestion and is not intended to fetter your action in any way, which, I daresay, will be taken with due regard to the importance of the work and its usefulness.

11. This division, as finally determined by you, should be entered in Register (A), a form of which accompanies, a copy of this register for the whole district being furnished to this office, in order that due arrangement may be made for the supply of printed forms of Enumerator's Schedules.

12. I take this opportunity to invite your very careful attention to the extreme importance of getting through these stages of the work with promptitude and correctness. If the house-lists are correctly prepared, and the division into Blocks, Circles, and Charges, and the nomination of qualified agency, is made with proper exercise of judgment and discretion, you may safely look to the successful completion of the more onerous task of enumeration.

13. You should, therefore, spare no pains to make a tour in your district and satisfy yourself of the work of your subordinates. The rules regarding the preparation of Register (A) will be found in the accompanying note.

CENSUS REGISTER A (RURAL TRACTS).

INSTRUCTIONS.

(To be printed on the back of the outer sheet of the Register).

Columns of Register A.

Col. 1, No. of village on Revenue List.
2. Name of village (or ward).
3. Sub-divisions of village (or ward).
4. Estimated population. } In each sub-division.
5. Total No. of houses. }
6. First Serial No. of houses. }
7. Last Serial No. of houses. }
8. First Serial No. of houses. } In each block.
9. Last Serial No. of houses. }
10. Total No. of houses. }
11. No. or letter of block. }
12. Name, designation and residence of enumerator. }
13. No. and Head-Quarter. }
14. Name, designation and residence of supervisor. } Of each circle.

[Size of Register page 13½ by 8½ in.]

1. The object of this register is to secure the inclusion in the Census Block of every village, hamlet, street, lane, encampment, landing-place, boat, house or hut in the charge, so that the enumerator may have no excuse for leaving unvisited any building, boat or other place in which any person may be stopping at the time of the Census, and that no traveller or wanderer may be likely to escape enumeration, wherever he may be at that time.

2. The Superintendent of a rural charge should fill in this register from the information contained in Form B entering the sub-divisions of each village in column 3. He must begin with the main village site, where there is one, and proceed to enter in the order, in which they can be most conveniently visited, the quarters occupied by the village menials, and other low castes, the hamlets, landing places of boats, *Sarais*, *Dharamsalas*, wells, &c., where travellers usually stop the night, and detached houses, farms and settlements in the fields, forests, or grazing grounds, marking the position of each on a rough map of the *locality*.

3. He should ascertain the number of persons usually residing in each of these sub-divisions and enter it in column 4. He should also enter in column 5 the number of houses in each, as recorded in Register B; at the same time he should find out what persons, officials or others in his charge, are competent and probably willing to act as supervisors and enumerators respectively, at the Census, and enter their names, designations and residences on a separate list.

4. He must then take or send this list and the register filled in as far as column 5 to the officer of the district to whom he is subordinate, communicating to that official the suggestions he has to make about the distribution of the places named in columns 2 and 3 into blocks and circles. He may enter these proposals in pencil in columns 11 to 14 and even on the map which should accompany his remarks; but until the approval of the District Officer has been communicated, they must not be considered as final.

5. In making the above proposals the charge Superintendent should take into consideration the distance between each of the sub-divisions, apart from the number of houses and people in them; and no block should be proposed in which an enumerator will not be able to visit each house and make the necessary inquiries at the time of Census within the space of about 5 hours. In the main site of a village an enumerator will probably be able to thus complete about sixty

houses or three hundred entries, but where there are detached hamlets and landing places, the block must be made much smaller.

6. When the blocks and circles have been finally determined as herein before provided, columns 6 to 12 of Register A should be filled in under the immediate guidance of the District Officer. A fair copy of the portion *relating* to each block must then be made and stitched into the book of schedules under the immediate eye of the supervisor with whom rests the responsibility of seeing that every enumerator is thoroughly acquainted with his block before the morning preceding the Census.

Towns.

7. In towns, the District Officer or the President of the Municipal Committee where there is one, will be responsible for the preparation of these lists. The work must be done in more detail than in rural charges, a sketch map of each charge should be prepared and sub-divided into circles. The supervisors should also be furnished with a block map to guide them into every corner of their circles. The ward (or *mohalla*) will ordinarily form the main sub-division, and its name should be entered in column 2 of list A, whilst in column 3 should be entered the name of every street, alley, court, lane and other sub-divisions in the order in which they can most conveniently be traversed at the Census. When the whole area has been divided into blocks and duly mapped out, the house numbering should begin. The Census numbering moreover, must be based on convenience in visiting each house in succession, as by traversing one side of the street or lane completely before crossing to visit the other. It is these Census numbers that must be entered in columns 6, 7, 8, 9 and 10 of list A, after list B has been completed. Columns 4 and 5, are for guidance in distributing the blocks, the municipal records, if any, may be used in filling them up.

8. In sub-dividing towns into blocks it must be borne in mind that though the population is closer-packed, and the enumerators have therefore an easier task on the Census night, the variety of caste, religion and occupation is much greater than in a village, so that to facilitate abstraction, when the Census is over, it is advisable to make the blocks small.

9. Supervisors must provide themselves with the extracts from list A, relating to their circles, and should also have a rough map of that area prepared by them showing the relative position of each village, hamlet, landing place, or detached home-steads.

Nos. 530—531, dated 7th August 1890.

From—Rai Bahadur Pandit Bhag Ram, Judical Member of State Council.

To—The Provincial Governors, Jammu and Kashmír.

I have the honor to enclose copies of the Circulars issued by me regarding the Census of the Kashmír State for your information and take the opportunity to bring to your notice that while the brunt of the work falls on Wazir-Wazarats, the Judges of the Sadar Adalats and Presidents of Municipal Committees, you are nevertheless primarily responsible for the successful and efficient control of the operations, and should with that view, adopt such measures as you may consider necessary to see that the instructions are promptly and correctly acted upon, and that the work in all its stages is most promptly and expeditiously performed.

2. The State Council trust that having regard to the paramount importance of Census work and the responsibility devolving on you as the Executive Head of the Province, you will give the subject your most serious attention, and accord to it your hearty co-operation. It is needless for me to add that on your prompt and energetic action alone will depend the successful completion of the work by your subordinates, and that you should lose no time and spare no pains to keep yourself acquainted with the progress which is being made and the manner in which the work is done by your subordinates.

Circular No. 3, dated 7th August 1890.

From—Rai Bahadur Pandit Bhag Ram, Judicial Member of State Council,

To—Governor and Judges, Sadar Adalats.

No. 535, dated 9th August 1890, to Governor, Jammu.
No. 534, dated 9th August 1890, to Governor, Srinagar.
No. 537, dated 9th August 1890, to Judge, Jammu.
No. 536, dated 9th August 1890, to Judge, Srinagar.

It appears to me that the Wazir-Wazarats as usual have taken no steps up to this time to ensure the preparation of the house-lists, and in certain instances, I understand that my Circular No. 1, of 19th July 1890, has been treated as a dead letter. The delays which ordinarily take place in this State in the disposal of ordinary business, may to a certain extent be excusable, but I think in the case of the Census, all officers must clearly understand that the slightest lukewarmness, want of energy and dilatoriness on their part, will render them liable to the severest displeasure of the State Council.

2. You should, therefore, make enquiries and let me know at the earliest practicable date, which of the Wazir-Wazarats were particularly dilatory in complying with the orders issued, in order that their conduct may be brought to the notice of the State Council.

3. Every officer entrusted with Census work must reply references made to him within 24 hours of their receipt by him. The Census work in all its stages must be performed with the greatest expedition possible, and on no excuse whatever, the making of periodical tours, instruction of subordinates and supervision of the work, should be delayed or put off to suit one's personal convenience.

4. The Government of India has called for a Progress Report by the 1st week of September 1890 regarding which I have addressed you separately, and I have every reason to hope that you will be able to submit it by the prescribed date.

5. You should in future direct every Wazir-Wazarat to submit a fortnightly Progress Report to you, so that you might be kept informed of the manner in which the work is progressing.

Circular No. 4, dated 22nd August 1890.

From—Rai Bahadur Pandit Bhag Ram, Judicial Member of State Council,

To—Wazir-Wazarats, Kashmir State.

1. You have now been furnished with detailed instructions regarding the preparation of the house-list (Register B) a specimen form of the house-list filled in for an imaginary village, and a sample of the rough village map, and I await a detailed report from you on the following points:—

1*st*.—What agency has been employed on the preparation of the house-lists.

2*nd*.—What arrangement has been made for supervision ?

(*a*) Checking by Supervisors.

(*b*) Checking by Superintendents.

3*rd*.—What places in your district were visited by yourself ? And with what result ?

4*th*.—Are the house-lists in your district in course of completion ? if so, by what date they will be completed ? Give number of villages completed, and those in course of completion.

5*th*.—Have the houses been numbered ?

6*th*.—Have rough maps been made out as required under the rules ?

7*th*.—Are there any villages in which the work has not yet been commenced, if so, why ?

2. This report should be submitted to me direct, within a week of the receipt of this letter, a copy being at the same time furnished to the Judge Sadar Adalat and the Provincial Governor.

Standard Questions to be asked by the Census Officer who fills up the Schedules.

Note.—These questions indicate the main points on which enquiries are to be made, but the instructions and rules must be carefully studied before the person filling up the schedules begins his task, so that if the answers first given to these questions do not contain the information required according to the rules, additional questions must be asked until the answers furnish that information.

Part I.—QUESTIONS ON THE FIRST ROUND.

1. Who is the head of this family, residing here ?
2. (Column 2)—What is your name ?
3. (Column 3)—What is your religion ?
4. (Column 4)—What is your caste (tribe, race, &c.) ?
5. (Column 6)—How old are you, that is how many years have you completed ?
6. (Column 7)—In what State or Province were you born ? If not in State, in what Province of British Territory ? If not in India, in what country ?
7. (Column 8)—How do you get your living ? If from the land, are you owner or tenant ? Have you any other occupation besides agriculture ? If you have, what is it ? If you have several occupations, which do you say is the principal one ? If you have no occupation, what is the occupation of your supporter ?
8. Now tell me the names of all who are ordinarily living or taking their meals with you ? First, the members of your family in order of age, next, your servants who live with you ; lastly, visitors likely to be here on the 26th of February ?
9. Now answer each question from 2 to 8 above, about each of the persons you have mentioned.

Part II.—QUESTIONS ON THE FINAL ROUND.

10. Listen while I read out the names of the persons entered as living in your house.
11. Are all these persons alive ? Has any one of them gone away or died, so that he is not living in or taking his meals from the house ?
12. Has any child been born in your house since the entries were made ?

If any person has come who was not entered before, answer all the questions from 2 to 8 about each of such persons.

Circular No. 5, dated 22nd August 1890.

From—RAI BAHADUR PANDIT BHAG RAM, Judicial Member of State Council.

To—Governors, Judges of Sadar Adalats, Presidents of Municipal Committees, and Wazir-Wazarats, Jammu and Kashmir State.

In my Circular No. 2, dated 23rd July 1890, I had the honor to furnish you with detailed instructions regarding the nomination of Superintendents, Supervisors and Enumerators, and the preparation of Register A.

2. Since then a copy of the enumerator's schedule, as finally settled, has also been furnished to you, and I have now the pleasure to enclose a copy of the code of instructions to supervisors. The enumerator's schedule and the codes will be printed at the *Mufid-i-'Am Press*, Lahore, and printed copies will be duly supplied to you for distribution in due course.

3. Meanwhile I again take the opportunity to invite your serious attention to the necessity for selecting the best men available. From a perusal of the enumerator's schedule you will find that the enumerator must not only be able to read and write, but must combine energy and intelligence to be able to carry on his work with regularity and precision. As the enumerators will be generally selected from non-officials, the appointment might be made attractive by giving each enumerator an *Irshad* in the accompanying form under the signature of the Wazir-Wazarat.

4. Printed forms of this *Irshad* will be furnished to you in due course. You must particularly impress on the enumerators that the *Irshad* shall be deemed to be a certificate of service to the State, and that it shall also be considered a qualification for future employment in the establishments of the State.

5. In regard to supervisors, it is needless for me to repeat that the Revenue, Judicial, Police, Education, &c., employés in the district, could be advantageously told off for this duty. The selection will, of course, be made by District Officers, but Judges of Sadar Adalats are particularly requested to see that the codes of instructions are thoroughly understood by the supervisors. You will see that the position of a supervisor carries with it great responsibility. He must himself be thoroughly conversant with the rules and orders, able to answer questions put to him by the enumerators, and must take an interest in his work.

6. You should so arrange that every supervisor must have his head-quarters within his circle, so that he may be readily accessible to the enumerators and might be able to visit the blocks subordinate to him as often as may be necessary.

7. The charge Superintendents of Census will be high officers, *viz.*, Tehsildars, Naib-Tehsildars, or in some cases Police Inspectors, who are already conscious of their personal responsibility, and will, it is hoped, perform their share of the work as ably as they can.

8. You should at the same time adopt a system of submission of Progress Reports by your subordinates. To keep the supervisors on their duty you must require them to report promptly to the charge Superintendent while the latter should report to you and the District Officer the progress that is being made in the various stages of Census work. I await a detailed report from you at your earliest convenience as to the measures taken by you in this respect.

9. I shall also be obliged by your issuing stringent orders to the District Officers that they must make a tour in their districts and personally scrutinize the papers under preparation.

Code for Supervisors.

1. You shall provide yourself with a rough map of your circle showing the position of the blocks, an extract from Register A containing detailed particulars regarding the enumerators' blocks in your circle, and a complete set of the intructions to enumerators.

2. You shall make a tour with the view of acquainting yourself with the position of the blocks in your circle, and in the course of your visit to each block furnish each enumerator with an extract from Register A, appertaining to his block, and direct him to acquaint himself with the relative position of the houses which he will have to deal with; you should also see that each enumerator is furnished with a block map, at the same time you should satisfy yourself by personal examination that each enumerator is sufficiently educated to fill the entries in the book; if you find him to be unfit for his duty you should at once submit a report to the charge Superintendent, with a view to the nomination of a better and qualified person in his place.

3. When you are satisfied that the enumerators in your circle are all thoroughly fit and qualified, and that each of them is intimately acquainted with his block, you shall summon them to your head-quarters and furnish them with the books which they have to fill in. Before delivery of these books it shall be your duty to fill in the blank pages intended for the house-list of the block. No enumerator shall be allowed to leave, until he has in your presence mastered the code of instructions, the specimen schedule and the set of questions contained in the book, and you must be particularly careful in clearing all doubtful points and in giving the enumerators the training neccessary for an efficient discharge of their duty. The training of enumerators must be completed by the first week of November.

4. You shall then direct the enumerators to proceed to their blocks and make entries on loose sheets for, say, 5 or 10 houses as may be determined by you. Every such entry must be carefully checked by you and if you find it to be correct in every particular, you should submit a report to the charge Superintendent in order that he may also satisfy himself by personal examination that no difficulty will be experienced in the preparation of the preliminary record.

5. You will note that the preliminary enumeration is not to be taken in hand before the 1st of January 1891.

6. If the rough entries made by an enumerator are not commendable, you shall stay in his block till the mistakes are thoroughly explained to him and till he has in your presence made fresh entries with accuracy and in conformity to the instructions.

7. You shall freely communicate with the enumerators in your circle and afford them every facility to seek your instructions, when they stand in need of them.

8. You shall keep a diary in the accompanying form showing the result of your visits to the blocks in your circle and submit copies thereof to the charge Superintendent once a week.

9. If any enumerator is dilatory in the performance of his duty, neglects to respond promptly to your call, or otherwise misbehaves himself, you will at once report him to the charge Superintendent who will take such notice of his conduct as he may consider necessary.

Preliminary Record.

10. The preliminary record will be commenced from 1st January 1891, when you must constantly move in your circle visiting the blocks within your jurisdiction and seeing that the work is promptly and accurately performed.

11. You must check all the entries made by the enumerators in your circle in each block.

12. You must at the same time satisfy yourself that all the houses borne on the house-list for the block are duly entered in the schedule.

13. When the preliminary record is completed, you shall report its completion to the charge Superintendent who shall then make his own examination of the entries made by the enumerators.

14. You shall initial the house schedules verified by you under your signature, noting below the date of such verification.

15. You shall warn your enumerators that the books should be written out legibly and that they are to remain in their custody till the day of the final enumeration.

Final Enumeration.

16. Not later than a fortnight before the date of the final enumeration, you should after personal examination ascertain and report to the charge Superintendent that the preliminary record of your circle is complete in every respect.

17. You must then visit each block and explain to the enumerator the way of conducting the final enumeration.

18. On the night of the Census and the following morning, you should pay a visit to each block in your circle, and in a summary manner watch the progress of work.

19. You must arrange that the enumerators are present in their respective blocks, and are duly provided with red ink to enable them to make corrections and alterations in the schedule.

20. If there are any special gatherings in your circle, in any *Sarai*, encamping grounds or other place on the night of the Census, you must appoint special enumerators to fill in the schedule.

21. Wandering tribes should be counted at the place where they are found on the night of the Census, special arrangements being made to ensure a correct record.

22. On the following morning you shall examine carefully the corrections and additions, &c., made on the previous night, and see that the rules have been strictly conformed to.

23. Separate rules will be issued regarding the action to be taken in regard to the enumerator's books after the final enumeration.

Code of Instructions for Superintendents of Census.

1. You are, subject to the orders of Wazir-Wazarat, primarily responsible for the successful completion of Census operations in your charge.

2. You shall provide yourself with (*a*) a rough map showing the circles and blocks in your charge (*b*) the detailed Register A of blocks and circles, and (*c*) a copy of the register of houses.

3. Under your immediate guidance and supervision, the supervisors of circles shall be furnished with the block map and Register A for their respective circles.

4. You shall, subject to the sanction of the District Officer, appoint supervisors and enumerators in your charge, arrange for the distribution of Census papers and before starting work, see that the rules and instructions are understood.

5. You must see that no illegal exactions or malpractices are made by your subordinates employed on Census.

6. You must see that the objects of the Census are understood by the people.

7. You must move about within your charge, on a tour of inspection of the work being done, and must by personal examination, satisfy yourself of its correctness. With this object you may check as many entries in each block as you may think fit, not less than 10 per cent. of the whole.

8. You shall carefully study the rules and instructions, and explain them to your subordinates.

9. You shall submit such periodical reports to the District Officer, the Judge Sadar Adalat and the Provincial Governor, as may be prescribed in this behalf.

DIARY OF SUPERVISOR CIRCLE NO. DISTRICT.

Three pages should be set apart for each Block, and as each Block is visited the result should be briefly noted in its proper place. The pages should be ruled and provided with the following headings :—

_____ ENUMERATOR BLOCK NO. 1.

Month and date of arrival of supervisor.	Date of departure.	Number of entries checked by supervisor.	REMARKS: Explaining further particulars, relating to the quality and quantity of work done.

FORM OF IRSHAD TO BE GRANTED TO AN ENUMERATOR.

_____ *District.*

_____ *Circle.*

1. The State Council has learnt with pleasure that you have volunteered to serve as an enumerator.

2. You are therefore appointed Enumerator of Block No.——and this Sanad is hereby granted to you in recognition of the service you have agreed to render to the State Council.

3. You shall keep this document in your possession, and perform your duties to the satisfaction of your superiors.

Circular No. 6, dated 12th September 1890.

I have the honor to request that as soon as Register B (house-list) has been completed and finally checked, you will be good enough to prepare and submit to this office an abstract statement in the accompanying form—

District.	Tehsil.	Name of village or town.	No of houses.	No. of permanent residents.	REMARKS.
1	2	3	4	5	6

2. The statement should be totalled for each Tehsil and District separately.

3. You should at the same time compile and submit a statement for the whole province in the following form, for villages and towns separately :—

Name of District.	No of Tehsils.	No of villages.	Total No of houses.	Total No of residents.	Remarks.
1	2	3	4	5	6

Name of District.	Name of town.	Number of houses.	Number of residents.	Remarks.
1	2	3	4	5

Circular No. 8.

Census Department.

Immediately after the Census the supervisor shall take charge of the books brought in by the enumerators, and verify them with the circle register of blocks and books issued. The supervisor must see that no books are kept back by the enumerators and that in each case the enumerator's abstract is duly prepared and checked. He shall then prepare and compile the "abstract" for the whole circle, after which the books must be tied up in serial order of registration and brought to the Tehsil office.

2. The Tehsildar shall prepare a *chalan* in the form hereinto annexed for the whole Tehsil, and send it with the books to the Wazir-Wazarat who shall prepare an index register of the whole consignment for his district and forward it to the Provincial Superintendent of Census to whom he is subordinate. The Provincial Superintendent shall cause the consignments received from districts to be thoroughly examined and delivered to the record-keeper who shall be responsible for their custody and verification.

FORM OF CHALAN REFERRED TO IN RULE II.

_____ *District.*

_____ *Tehsil.*

1	2	3
Name of Supervisor.	Number of Blocks in Circle.	Number of books.
Total ...		

FORM OF INDEX REGISTER.

———————— *District.*

1	2	3	4	5	6
Tehsil.	Name of Supervisor.	Serial number of blocks.	Number of Enumerator's books.	Serial number of books 1 to—	Remarks.

The register should be totalled for each Tehsil, and for the whole district the number should be noted on the block book in red ink for purpose of identification.

Circular order by President of Council.

Dated 10th December 1890.

It has come to notice that in spite of repeated orders issued by this office and the Superintendent of Census operations in Jammu and Kashmír, Revenue Officers generally have displayed utter indifference and apathy in the discharge of Census duty. A number of Wazir-Wazarats and Tehsildars have absolutely done nothing and are said to have not even taken the trouble of acquainting themselves with the rules and instructions.

2. They must know that Census operations are conducted under the orders of the Government of India, and that undersigned will feel himself bound to visit with condign punishment such of the delinquents as are found guilty of wilful relaxation of duty.

3. On receipt of this Circular it shall be the duty of every Tehsildar and Wazir-Wazarat to make a tour in his jurisdiction and satisfy himself that the enumerators and supervisors are all present and willing to discharge their respective functions.

4. Every officer engaged in Census work must keep a diary of his proceedings and forward a copy of the same to the Provincial Superintendent for information.

Extract from Proceedings of a meeting of the Jammu and Kashmír State Council, held at Jammu, on Wednesday, the 26th March 1890.

Read Census Commissioner for India letter No. 19, dated March 1890, received under Resident's endorsement No. 346, dated 19th March 1890, regarding a Census of the population of the Kashmír State, the Resident enquiring what the Council propose doing in the matter.

VI. Resolved unanimously that the Member in charge of General Department be appointed Superintendent of Census for the whole State, and that he be requested to prepare a reply to the queries of the Census Commissioner for the consideration of the Council.

Extract from Proceedings of a meeting of the Jammu and Kashmír State Council, held at Jammu, on Wednesday, the 9th April 1890.

Read proposals of General Member regarding Census operations in compliance with Resolution No. 6, dated 26th March 1890.

XXII. Approved, reply to be sent to Resident accordingly.

Extract from Proceedings of a meeting of the Jammu and Kashmír State Council, held at Jammu, on Wednesday, the 16th April 1890.

Read General Department Memo. in connection with Census operations in 1891.

XXV. Resolved that proposals of the General Department be sanctioned, the cost to be debited to miscellaneous Foreign Department.

Extract from Proceedings of a meeting of the Jammu and Kashmír State Council, held at Jammu, on Friday the 25th April 1890.

Read Resident in Kashmír letter No. 443, dated 18th April 1890 proposing to transfer the management of Census operations in the Kashmír State from Khan Bahadur Sheikh Gulam Mohy-ud-din Khan to Rai Bahadur Pandit Bhag Ram and to ask the Settlement Officer to give his best assistance as his establishment will be utilized to a great extent in the matter.

I. Resolved that the suggestion of the Resident be approved.

Extract from Proceedings of a meeting of the Jammu and Kashmír State Council, held at Srinagar, on Tuesday the 28th August 1890.

Read Judicial Member's Memorandum bringing to notice that for the present a monthly expenditure of Rs. 500 on account of Census establishment employed throughout the State, and a lump sum of Rs. 1,000 for Jammu, and Rs. 1,000 for Kashmír, on account of contingencies, paper, &c., be sanctioned, debitable to the General Revenues of the State.

58. Resolved that the proposal of the Judicial Member be sanctioned.

Extract from Proceedings of a meeting of the Jammu and Kashmír State Council, held at Srinagar, on Thursday the 28th August 1890.

Read Judicial Member's Memorandum, submitting for information, the rules and instructions issued by him in connection with the approaching Census—

(1) Circular laying down instructions for registration of houses, &c.

(2) Rules regarding the preparation of Index Register A.

(3) Specimen forms of house-list and block map.

(4) Enumerator's Schedule, code of instructions and set of questions, &c.

(5) A code of instructions for supervisors and Superintendents of charges.

(6) Circulars issued to Governors, Judges Sadar Adalats, regarding supervision and control of Census arrangements.

Judicial Member brings to notice that the Wazir-Wazarat of Ladákh has not started work up to date for want of forms in the Tibetian character, although with the sanction of the President he was informed that entries in Tibetian characters might be made in manuscript.

IX.—Recorded.

Extract from the Proceedings of a meeting of the Jammu and Kashmír State Council, held at Jammu, on Tuesday the 16th December 1890.

Read Judicial Member's Memo. bringing to notice that in the absence of any information it is impossible to express an opinion on the result of Census operations in Gilgit and Skardu and the Feudatory States excepting Bhadrawah.

1*st*.—The house-lists of Kashmir and Jammu Provinces have all been finished, but in spite of repeated telegrams the Wazirs of Gilgit and Skardu have not yet submitted the abstract statements called for in Circular No. 6.

XXXVIII.—Resolved that necessary action in the matter be taken by the Prime Minister.

2*nd*.—The Wazir of Udhampore made false reports regarding completion of house-lists, while that of Manawar has been grossly dilatory in the discharge of his duties. The Jasrota man contravened orders by leaving his District for Jammu.

Resolved that the Wazir-Wazarats be warned that a recurrence of such conduct shall render them liable to summary dismissal. Further that the President of the Council be authorised to inflict punishment on delinquents without reference to State Council.

3*rd*.—The Census Superintendent regrets to observe that considering the dilatoriousness of the Local Revenue Officers in the preparation of the house-lists, the more important work of enumeration could hardly be expected to be pushed through, if such a state of things continues, and he begs that an example be made of the delinquents whose conduct has been specially reported by the Judge Sadar Adalat, and that power be given to the President of the Council to inflict immediate punishment on those who may be reported to His Highness in future.

4*th*.—Tehsildar Kashi Nath of Reasi has addressed a most improper and impertinent communication to the Judge, Sadar Adalat, which is specially laid before the Council in order that the controlling authority of the Judge be maintained by visiting the culprit with condign punishment.

Resolved that Pandit Kashi Nath be dismissed forthwith.

5*th*.—It should be definitely declared that the Census Superintendent has no concern with the operations in Punch and other feudatory jagirs, as he has practiclly no control over those parts.

The Council note that the feudatory jagirdars are by their own engagements personally responsible for Census arrangements within their jagirs, but the Census Superintendent may specially depute his nominees whose pay will be defrayed by the jagirs concerned, with a view to ascertain the quality and quantity of work which has been performed.

6*th*.—That villages of Jammu and Kashmir proper held by feudatory dependent chiefs in farm, mortgage or otherwise, ought to be supervised so far as Census operations are concerned, by the State officials, but the agents of these chiefs would not allow this to be done and the consequence is that those villages have been for the present excluded. Does the Council desire that they be deemed portions of the feudatory Jagirs and their Census incorporated with that of the main jagirs.

The Census of these villages must be supervised by State officials.

7*th*.—Great difficulty is experienced in respect of villages inhabited by Mians and the Census Superintendent is afraid that the final enumeration of these villages will not be so accurate as is deseired. This requires the special attention of the Council.

Resolved that Prime Minister be requested to make suitable arrangements.

Extract from Proceedings of a meeting of the Jammu and Kashmir State Council, held at Jammu, on Tuesday the 16th December 1890.

Read Census Superintendent's Memorandum laying before the State Council the final results of the house-lists of the Jummu and Kashmir Provinces as reported by Provincial Superintendents.

The figures for Gilgit, Skardu and Ladákh have not yet been received. The Ladákh papers are said to be in transit, but as regards Gilgit and Skardu no satisfactory replies to the repeated telegraphic reminders sent to the District Officers have been received. The house-lists, it may be said, have been prepared strictly in conformity to instructions but were it not for the cordial support accorded by Raja Amar Singh, President of the State Council, their completion, considering the absolute apathy and indifference displayed by the local Revenue Officers, was almost hopeless. The Judges of the Sadar Adalats of Jammu and Srinagar as well as Dr. A. Mitra, the President of the Srinagar Municipality, were most energetic and zealous in the performance of their duties, the two first named made an extensive tour in their respective jurisdiction and supervised the work of the local Officers and staff with care and expedition.

The Provincial Governors of Jammu and Srinagar did all in their power to help the Provincial Superintendents whenever their assistance was needed to rouse the District Officers and Tehsildars from their characteristically dormant state.

The preparation of the preliminary record and final enumeration is a task of no less difficulty, and the Census Superintendent trusts that the District Officers will be enjoined to carry it out with care and ability, and that power will be given to the President to punish any officer who is guilty of carelessness or neglect.

XLVI. Resolved that a copy of the Memorandum and its accompaniments be submitted to the Resident.

Resolved further that the services of the Judges of Sadar Adalats and Dr. A. Mitra, President of Srinagar Municipality, be acknowledged in suitable terms by an *Irshad* bearing the signature of the President of the Council.

Extract from Proceedings of a meeting of the Jammu and Kashmir State Council, held at Jammu, on Wednesday the 7th January 1890.

Read Prime Minister's letter No. 1488, dated 22nd December 1890 enclosing Mehta Sher Singh Wazir-Wazarat, Gilgit, letter No. 83, dated 22nd Katak 1947 setting forth the difficulties in successfully carrying out Census operations in Gilgit.

V.—Resolved that the Wazir-Wazarat be authorised to use his discretion in consultation with the British Agent at Gilgit to prepare the returns as correctly as possible under the circumstances.

The Council hope that the Resident will kindly advise Colonel Durand to help Mehta Sher Singh.

Extract from the Proceedings of a meeting of the Jammu and Kashmir State Council, held at Jammu, on Tuesday the 21st January 1891.

Read Census Superintendent's Memo. bringing to notice :—

(1) That the house-lists prescribed by Census Circular No. 6 have not yet been received from Gilgit and the feudatory jagirs of Punch and Ramnagar.

(2) That the Raja of Punch has not yet indented for any Census forms, nor submitted his Progress Report of the operations.

(3) That the abstract statement of houses and permanent residents is now over due and should be obtained from him without delay.

(4) That notwithstanding issue of repeated telegraphic reminders the Wazir-Wazarat of Gilgit has not submitted the house-lists of his district.

XX.—Resolved that a report be made to the Resident regarding the indifference of the Raja of Punch to the repeated calls of the Prime Minister, and that as regards Gilgit and Ramnagar, the President be requested to arrange for the prompt submission of the abstract of the house-lists.

BHAG RAM, PANDIT,
RAI BAHADUR,
Superintendent of Census, Kashmir State.
